The following are trademarks or registered trademarks of other companies.

Java and all Java-related trademarks and logos are trademarks of Sun Microsystems, Inc., in the United States and other countries.

Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both.

Microsoft, Windows and Windows NT are registered trademarks of Microsoft Corporation.

UNIX is a registered trademark of The Open Group in the United States and other countries.

SET and Secure Electronic Transaction are trademarks owned by SET Secure Electronic Transaction LLC.

* All other products may be trademarks or registered trademarks of their respective companies.

Notes:

Performance is in Internal Throughput Rate (ITR) ratio based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput improvements equivalent to the performance ratios stated here.

IBM hardware products are manufactured from new parts, or new and serviceable used parts. Regardless, our warranty terms apply.

All customer examples cited or described in this presentation are presented as illustrations of the manner in which some customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics will vary depending on individual customer configurations and conditions.

This publication was produced in the United States. IBM may not offer the products, services or features discussed in this document in other countries, and the information may be subject to change without notice. Consult your local IBM business contact for information on the product or services available in your area.

All statements regarding IBM's future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Information about non-IBM products is obtained from the manufacturers of those products or their published announcements. IBM has not tested those products and cannot confirm the performance, compatibility, or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

Prices subject to change without notice. Contact your IBM representative or Business Partner for the most current pricing in your geography.

IOS OA32092

- z/OS 1.9 and up
- **Problem:** WAIT0A2 not loaded after system is fenced by SFM. This new function APAR supports the handling of new Configuration Isolation CRW. See APAR for H/W levels required.
- **PTFs:** UA53801 to UA53804 (RSU1006)

SUP OA32286

- z/OS 1.11 and up
- Problem: High LPAR management time or uncaptured ratio when running with HiperDispatch=YES.
- PTFs: UA53757 and UA53758 (RSU1006)

XES OA32307

- z/OS 1.9 and above
- Problem: SQA shortage due to accumulation of XES control blocks representing CF requests.
- PTFs: UA55647 to UA55650 (tentatively RSU1008)

RSM OA33307

- **z/OS 1.11 and above**
- **Problem: High paging to AUX or high CPU in MASTER due to RSM frame steal operations.**
- **PTFs: APAR is OPEN**

OMVS OA33333

- **z/OS 1.11 and up**
- **Problem: hanging or delayed tasks when doing file system operations in a shared file system configuration.**
- **PTFs: UA55264 and UA55265 (tentatively RSU1008)**

Sunset of Enhanced PSP Tool

- **Enhanced PSP Tool will be removed on Dec 31st 2010**

<http://www14.software.ibm.com/webapp/set2/psp/srchBroker>

- **Its function has been replaced by FIXCAT information in Enhanced Holddata and REPORT MISSINGFIX function of SMP/E**

- **See ‘Statements of direction’ section in z/OS V1.11 announcement letter**
