Transform Your Data Center with an IBM Cloud

Agenda

Cloud Defined

Market Insights

IBM's Cloud Portfolio

Where to Get Started

- Development & Test

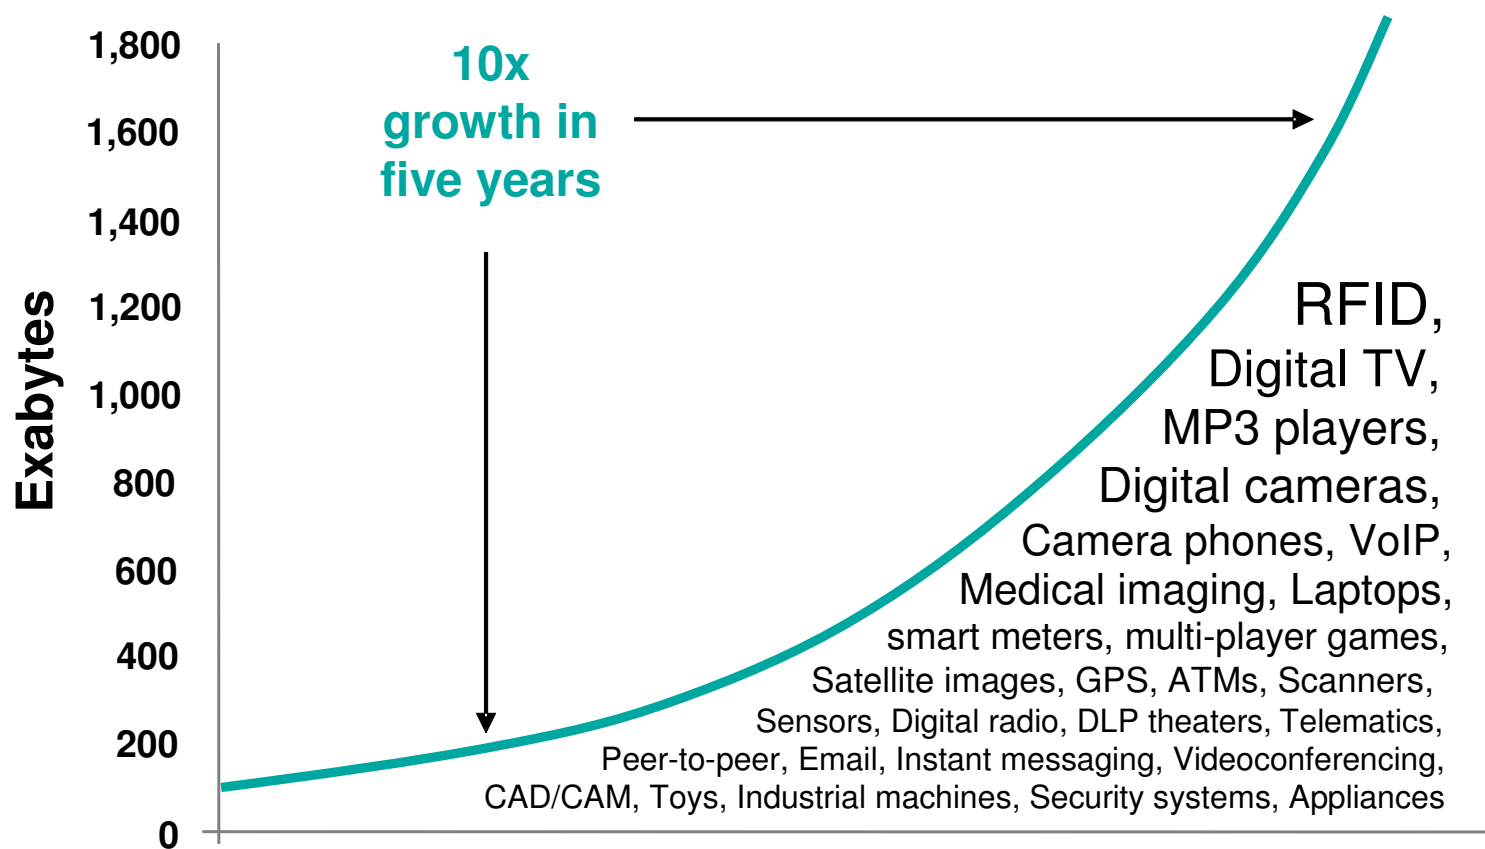

- Desktop virtualization

- Storage

- Collaboration/e-Mail

Summary

By 2011, the world will be 10 times more instrumented than it was in 2006. Internet connected devices will leap from 500M to 1 Trillion.

Approximately 70% of the digital universe is created by individuals, **but enterprises are responsible for 85% of the security, privacy, reliability, and compliance.**

Operations have industrialized to become smarter

Telcos automate traffic through switches to assure service and lower cost.

Manufacturers use robotics to improve quality and lower cost.

Banks use automated teller machines to improve service and lower cost.

IT also needs to become *smarter* ... about delivering “services”

- The growing complexity of IT systems and soon a trillion connected things demand that sprawling **processes become standardized** services that are efficient, secure and easy to access.
- A **Service Management System** will provide **visibility, control and automation** across IT and business services to ensure consistent delivery.
- “**Cloud Computing**” describes a new consumption and delivery model for IT services

Cloud computing defined

A user experience and a business model

- Standardized offerings
- Rapidly provisioned
- Flexibly priced

An infrastructure management and services delivery method

- Virtualized resources
- Managed as a single large resource
- Delivering services with elastic scaling

Similar to Banking ATMs and Retail Point of Sale, Cloud is Driven by:

- Self-Service
- Economies of Scale
- Technology Advancement

Four major categories of cloud computing services exist.

*Examples
IBM / Industry*

Industry-Specific Processes	Business Travel
Employee Benefits Management	Procurement
<i>Business Process-as-a-Service</i>	

Financials	Industry Applications	CRM
Collaboration		ERP
		HR
<i>Software-as-a-Service</i>		

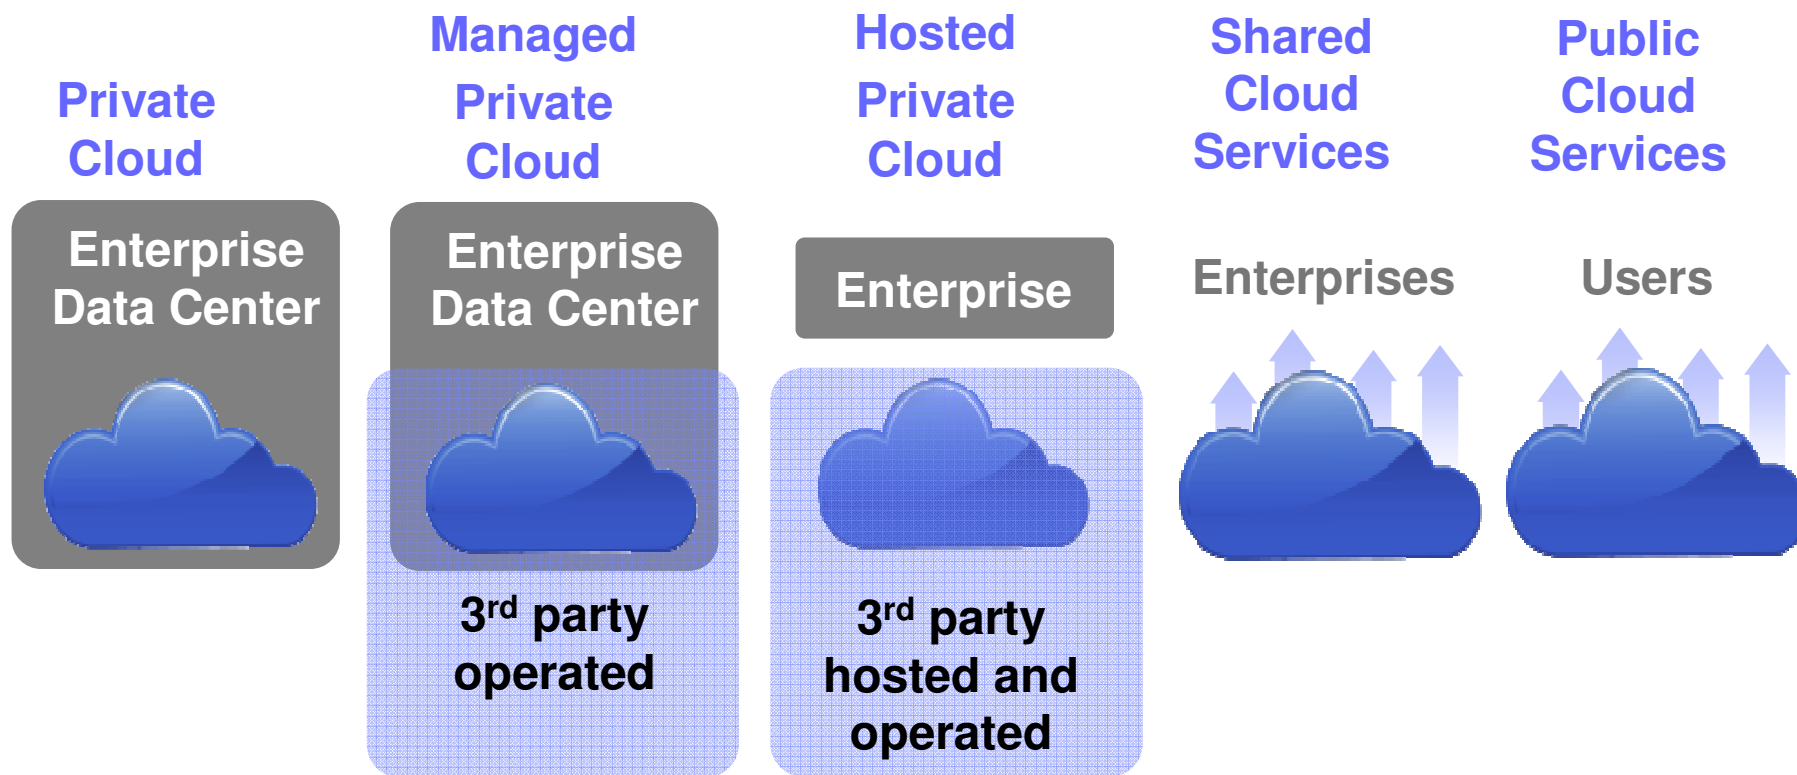

Middleware	Web 2.0 Runtime	Service Mgmt & Security
Databases	Java Runtime	Development Tooling
<i>Platform-as-a-Service</i>		

Servers	Shared, Virtualized Dynamic Provisioning	Data Center Fabric
Storage		Networking
<i>Infrastructure-as-a-Service</i>		

Multiple deployment models are possible.

Agenda

Cloud Defined

Market Insights

IBM's Cloud Portfolio

Where to Get Started

- Development & Test

- Desktop virtualization

- Storage

- Collaboration/e-Mail

Summary

Market Insights:

Cost savings and faster time to value are the leading reasons why companies consider cloud.

Lower IT Operating and Capital Costs

Capex to Opex

Standardization enabled by integrated service management

Cost Savings + Innovation = Value Creation

Removing IT complexity from end users

Fast access to current technology and powerful computing

Fine grained IT services with rapid provisioning

Market Insights:

Universal interest exists, across all industries and geographies.

Cost takeout is cited as the top value consideration

Cost savings is the key driver of public cloud adoption with clients seeking a 20 - 30% improvement in order to adopt

Security and control are top concerns

Over two-thirds say security is the top inhibitor to their use of public clouds

Workloads and patterns are emerging

Almost all workloads require connection to other IT services
Collaboration and analytics meta-patterns are occurring

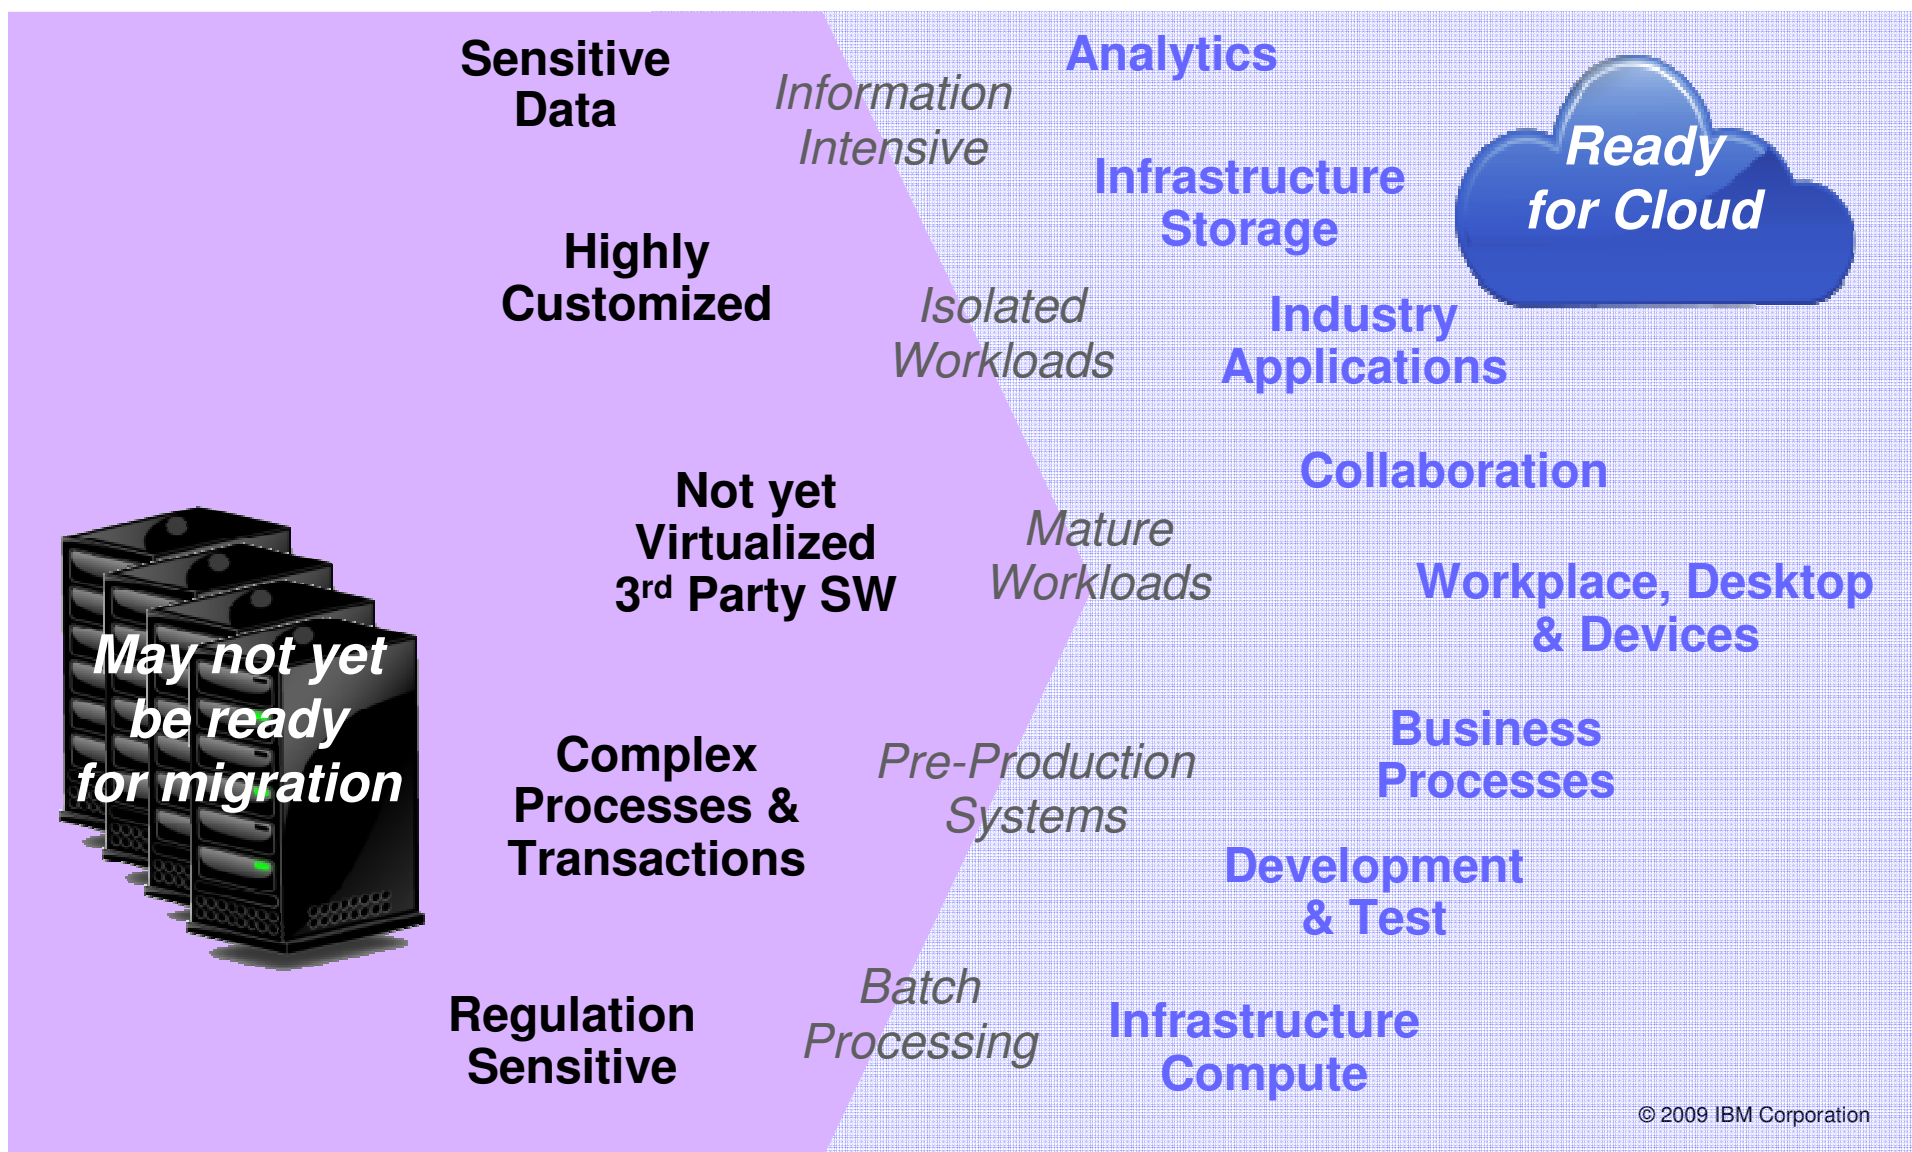

Industries with the greatest cost pressures lead adoption

Over 50% of clients in Retail, Manufacturing, Utilities, Government have cloud projects budgeted or in process

Market Insights:

Some workloads are ready for cloud delivery,

IBM's Cloud Portfolio

Where to Get Started

- Development & Test

- Desktop virtualization

- Storage

- Collaboration/e-Mail

Summary

IBM's cloud portfolio addresses the 6 strategic plays and differentiates IBM's offerings.

Four categories of offerings across IBM's brands:

- **IBM Smart Business On the IBM Cloud (Public Cloud Services)**
- **IBM Smart Business Cloud (Private Cloud Services)**
- **IBM Business and Technology Consulting Services**
- **IBM Software and Hardware Technologies**

IBM Differentiators

Workload optimization

Rapid return-on-investment and productivity gain

Deployment choices

Public, private, hybrid models fit client IT needs

Integrated service management

Lowers operational costs, drives efficiency, enhances security

IBM Cloud Portfolio – Commercial Clients

Public and Private Cloud Services

IBM Cloud Portfolio

Business and Technology Consulting Services for Cloud Computing

Plan

- **Strategy and Change Services for Cloud Adoption***
- **Strategy and Change Services for Cloud Providers***
- **Cloud Rapid Assessment Tool** (no charge – online)
- **Cloud Exploration Workshop** (no charge)
- **Infrastructure Strategy and Design Services for Cloud Computing**
- **Resiliency Consulting Services**
- **Data Center and Facilities Strategy Services**
- **Data Center Family™ Solutions – Design Services**
- **Networking Strategy and Optimization**

Build

- **Testing Services for Cloud***
- **Implementation Services for Cloud Computing**
- **Security Consulting Services in Support of Cloud Computing**
- **Express Managed e-Mail Security and Express Managed Web Security**

Deliver

- **Resiliency Validation for Cloud Computing**
- **Virtualization Security Solutions** (from IBM Internet Security Systems)
- **Software Support Services – Enhanced Technical Support**
- **Managed Support Services – Managed Technical Support**
- **Software Support Services**
- **Hardware Maintenance Services**
- **Information Protection Services**

IBM Cloud Portfolio

Software and Hardware Technologies for Cloud Computing

Business Process-as-a-Service

Software-as-a-Service

Middleware

- WebSphere Application Server Hypervisor Edition
- WebSphere Cloudburst Appliance
- CastIron Appliance
- DB2
- Informix Enterprise Server
- System Z Solution Edition for Cloud Computing

Analytics

- Cognos 8 Business Intelligence

Service Management & Security

- Tivoli Service Automation Manager
- Virtual Server Security for VMWare
- Rational Quality Manager
- Rational AppScan

Development Tooling

- Rational Software Delivery Services
- Rational Asset Manager
- Rational System Architect
- Rational Requirements Composer
- Rational Project Conductor

Platform-as-a-Service

Server & Storage Systems

- System x with new ex5 technology
- Power Systems with POWER7
- System z
- Scale out NAS Storage Systems

Workload Optimized Systems

- IBM Cloudburst
- Smart Analytics System
- Information Archive

Infrastructure-as-a-Service

Summary

IBM CloudBurst

A Breakthrough in Service Delivery for Data Center Workloads with a fully configured pre-integrated system

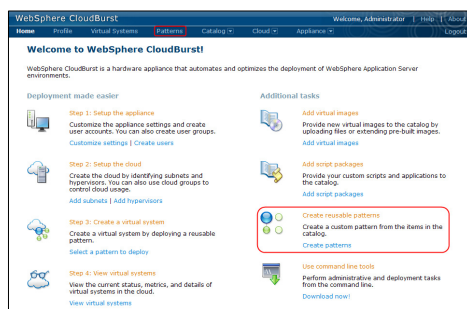

- For IT executives seeking a breakthrough in:
 - Delivery of service
 - Reduction in cost
 - Transformation of the data center into a Dynamic Infrastructure
- A complete system that integrates the service management software system with servers, storage, and Quickstart services, and financing to quickly enable a private cloud
- “Fit for purpose” based on the architectures required by specific workloads

**Hardware + Software + Services
Starts at ~ \$200k**

WebSphere Clouds: 2 products

1) WebSphere CloudBurst Appliance (hardware)

1) User requests WebSphere Application Server Hypervisor Edition Environment to be dispensed

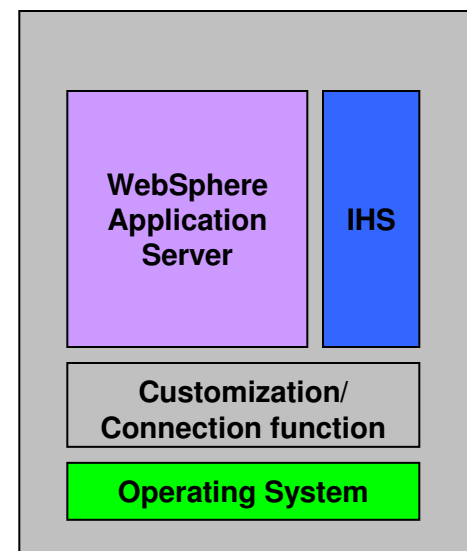

3) User can access WebSphere Application Server Hypervisor Edition Servers (Virtual Image)

2) CloudBurst dispenses WebSphere Application Server Hypervisor Edition Servers into a set of other machines

2) WAS HV (Virtual Image software)

The WebSphere CloudBurst appliance dispenses these virtual images into a private cloud

IBM Smart Business Development and Test Cloud

A secure, private cloud environment clients can use to test applications before sending them to production

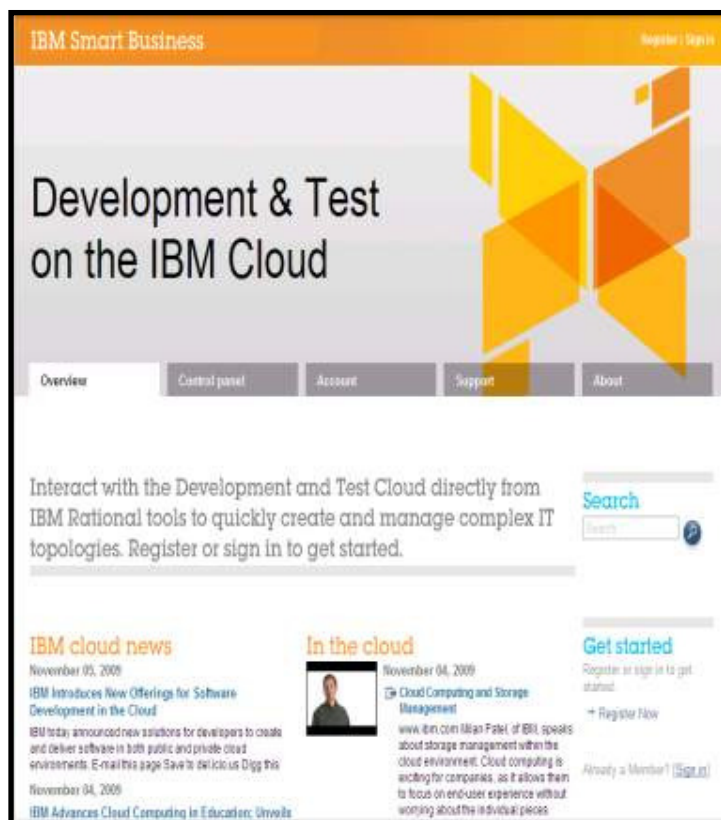

- Creates a more efficient test environment that improves productivity and reduces costs
- Includes an operating system, middleware, storage, network and virtual images, along with pre-integrated set of services, from planning through implementation
- Clients can leverage their existing systems or IBM's new CloudBurst

Customer Benefits:

- **Reduce IT labor cost by 50% +**
- reduce labor for configuration, operations, management and monitoring of the test environment
- **75% + Capital utilization improvement; Significant license cost reduction**
- **Reduce Test Provisioning cycle times from weeks to minutes**
- **Reduce risk and improve Quality- eliminate 30% + of all defects that come from faulty configurations.**

Smart Business Development and Test on the IBM Cloud

**Usage-based, simple pricing
with no hidden charges**

For pricing, see:
[Smart Business Development and Test on
ibm.com](http://www.ibm.com)

What is the service?

- A dynamic virtual development and test infrastructure service, designed for the enterprise, on the IBM Cloud

What is the client buying?

- Choice of virtual server configurations
- Option to add persistent storage charged per usage
- Network bandwidth charged per usage
- Choice of pre-configured software images
 - Rational Application Lifecycle Management software
 - Lotus, WebSphere, DB2 and Informix stacks

What payment options are available?

- Pay-as-you-go option (per VM hour charge)
- Shared Reserved option
 - 6 bundles (small, medium, large for 6 or 12 months)
 - Reserved capacity plus discounted usage rate

What support is available?

- Web-based forum for users to submit requests
- Premium support 24X7 *

IBM Smart Business Desktop Cloud

Characterized by thin clients, with higher levels of security and resilience, improved backup and recovery...and reduced cost and complexity associated with managing the desktop/laptop environment

Integrating hardware, software and services in an innovative solution

- Allows clients to create a private cloud that enables internet-based PCs and other devices to access applications and data through a centrally managed computing environment
- Maintains highest levels of quality and security in accessing critical information remotely, from any device, anywhere
- Helps clients quickly scale their IT infrastructures to address business demands, while reducing cost and complexity
- Helps clients use up to 73 percent less power than traditional desktops and laptops

Available as two different offerings:

- Implementation only services
- Implementation and Managed services

Customer Benefits

- **Reduce desktide support costs by 85-90%**
- **Reduce help desk calls by 20-40%**
- **Reduce OS and application update costs**
- **Easily ensure desktop security and resiliency**
- **Use up to 73% less power over traditional fat client deployments**

IBM Smart Business Storage Cloud

Business Challenge: *Storage and Data Optimization*

- Speed deployment of storage applications
- Allow storage infrastructure to adapt dynamically to business requirements
- Improve cross-company collaboration and file/data sharing while controlling capital expenditures

Solution: *Scalable and Integrated IBM Storage Cloud*

- Lower the total cost of ownership related to enterprise storage, including:
 - Exceptional scalability in throughput and capacity
 - Dynamic Information Lifecycle Management
 - Multi tier storage support, including tape media
 - Rich set of services including management, hosting and expert services in data migration & performance tuning

Why IBM?

- Built on unique models and technology originally developed jointly in collaboration between IBM's own CIO and IBM Research
- Leading global skills and proven storage cloud computing environments for mission-critical business applications

Customer Example:

A telecommunications firm needed a highly scalable and cost-effective environment for providing an innovative new online media and content services to their users, allowing them to share photos, video and audio including unlimited media storage and unlimited uploads.

Start small and grow rapidly - the initial client solution consisted of 50 servers, 3TB of SAN storage, networking and 80TB of Scale out File Services storage. The client expects the dedicated storage cloud component to grow to in excess of 1 Petabyte within a short period and the number of servers to potentially grow to hundreds. This telecommunications firm found that SBSC dedicated storage cloud services offer a predictable cost model for planning and growth.

LotusLive Offerings

Web Conferencing

LotusLive Meetings (Sametime Unyte Meeting)

Full-featured Web conferencing service includes polling, hand raising, record & playback.

- Supports G1 languages

Starting at \$6 per user per month

LotusLive Events (Sametime Unyte Events)

Internet-based event capabilities. Provides tools to create & manage webinars.

Starting at \$79 per user per month
Unlimited events

Collaboration

LotusLive Engage

An integrated suite of Web collaboration and business networking solutions including:

- On line Meetings
- Survey Forms
- Files
- Live Charts
- Chat service
- Profiles and Contacts
- Activities

Starting at \$8 per user per month

Lotus Live Connections

An integrated suite of Web collaboration and business networking solutions including:

- Files
- Activities
- Chat service
- Profiles and Contacts

Starting at \$6 per user per month*

eMail

LotusLive Notes (Lotus Notes Hosted Messaging)

Full-featured, dedicated hosted email service (rich client and browser)

- Supports 27 Languages

[Add-ons](#)

LotusLive Mobile for Blackberry LotusLive Sametime IM

Starting at \$9 per user per month
Minimum 1000 authorized users

LotusLive iNotes

Web-based Email service with personal calendar & shared contacts. Mobile sync capability.

Starting at \$3 per user per month*

For pricing, see:
[Lotus Live on the web](#)

*Bundle Connections and iNotes for \$7 per user per month

What does Cloud have to do with me?
Wednesday 3:00 to 4:00, Room 201

Optimize Your Heterogeneous SOA Infrastructure
Thursday 8:00 to 9:00, Room 201

In Summary

- **Cloud economics and technologies are real**
 - Clients can achieve significant ROI
 - Enterprises can speed innovation
 - Multiple deployment models will co-exist
 - Workloads will drive adoption

- **IBM's portfolio supports Cloud requirements**
 - Smart Business On the IBM Cloud Services
 - Smart Business Cloud Services
 - Business and Technology Consulting Services
 - Software and Hardware Technologies

- **For most clients, three offerings are priorities**
 - Development & Test Cloud
 - Desktop virtualization
 - Collaboration and e-Mail

- **IBM has significant experience and credibility, starting with its own cloud implementation**
