Businesses are challenged to deliver innovation

80%

64%

3x

CEOs anticipate turbulent change and bold moves.¹

of CIOs work with senior business executives to drive innovation.²

increase in the gap between leaders' need and their ability to deliver it.¹

¹2008 IBM CEO study. ²IBM Global CIO Study 2009.

Many companies consider IT an inhibitor to innovation and a source of inflexibility

“The message for IT is clear; business needs and expects greater agility from IT. A new approach to IT delivery models and sourcing options is required that allows IT organizations to be more responsive to the needs of the business.”

Gartner, October 14, 2008, “Changing the Cost Structure of IT Will Become a Business Imperative for Most CIOs”

Challenges to achieving greater value from your IT investments

Applications

"We don't understand the effort, risk and impact of modernizing our legacy applications."

People

"Our skills gap keeps growing. How do we stay current with all the language and technology changes?"

Teams

"Our teams on different platforms are struggling to communicate. How do we collaborate in the context of our work?"

Infrastructure

"We need a cost effective way to improve our infrastructure efficiency and free up capacity to handle more volume"

IBM Rational Enterprise Modernization solutions can help

Optimize your applications, people, team and infrastructure investments

Increase flexibility

Boost productivity

Maximize business agility

Increase system utilization

- **Increase flexibility** by revitalizing existing application portfolios
- **Boost productivity and accelerate innovation** with modern skills
- **Maximize business agility** by bridging organizational silos
- **Increase system utilization** by leveraging hardware capabilities

Rational Software Delivery Platform

SHARE in Boston

Enterprises want to...

Understand the impact and cost of change to their IT systems

SHARE
Technology • Connections • Results

But...

They have no business intelligence inventory of their application assets, relying instead on manual and error-prone processes and incomplete knowledge. They must compensate with more extensive planning and extra testing.

SHARE in Boston

Solution: Business intelligence for applications

Restore lost application knowledge via technical analysis

Application Artifacts

Mainframe

- COBOL
- PL/I
- DB2
- IMS/DC
- CICS
- Job Control Language
- High-level Assembler (HLASM)

Distributed

- Java
- WebSphere
- HTML
- WSDL
- Enterprise Archive (EAR)
- Web Archive (WAR)
- C++

Application inventory

*Rational Asset Analyzer
WebSphere Studio Asset Analyzer
Application Health Assessment*

Delivering...

Reduced risk by quickly determining the full impact of proposed changes and lowered costs via dead code elimination, optimal planning, focused testing and faster development

Enterprises want to...

Reuse existing assets to reduce duplication and speed time to market

SHARE
Technology • Connections • Results

Do we already
have code to
do this?

But...

They do not have the infrastructure to establish a reuse culture

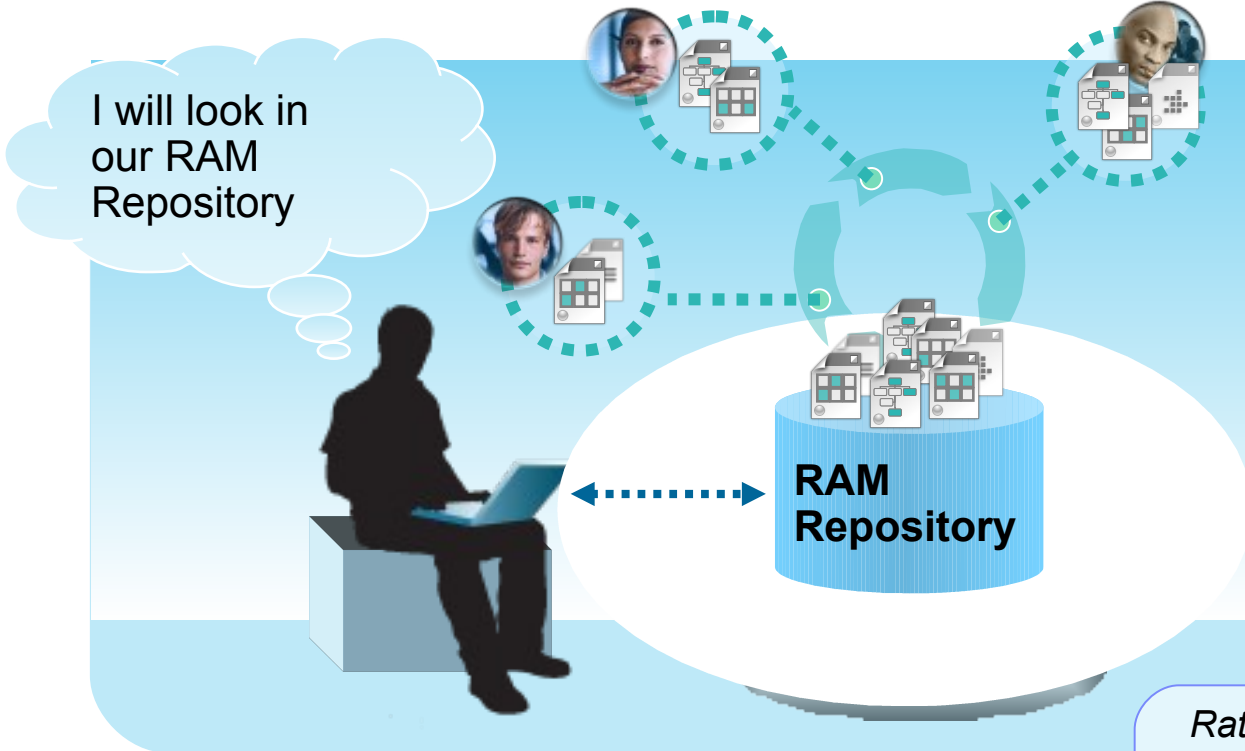

SHARE in Boston

Solution: Operational reuse

Instill proactive asset management of all IT artifacts into the organization's processes and culture by deploying a reuse infrastructure

SHARE
Technology • Connections • Results

*Rational Asset Manager
WebSphere Service Registry and Repository*

Delivering...

Greater reuse, development efficiency, faster time-to-market, and higher quality

SHARE in Boston

Enterprises want to...

Provide a range of appealing, more intuitive user interfaces to increase employee productivity and boost customer satisfaction

SHARE
Technology • Connections • Results

But...

The cost of replacing or re-writing these applications is prohibitive, and they may not have the necessary web and UI technology skills

SHARE in Boston

Solution: User interface modernization

Deploy the ideal UI for your application, from quickly creating a modern

Web UI out of an existing green screen application to customizing a highly interactive, graphical Web 2.0 UI

- Rational EGL*
- Host Access Transformation Services*
- Rational Developer for System z*
- Rational Developer for Power Systems*
- Rational Business Developer*
- Rational Application Developer*

Delivering...

Greater customer satisfaction, lower employee training costs, and fewer errors from more modern and compelling UIs

SHARE in Boston

Enterprises want to...

Reduce tool support costs and move to modern platforms languages, and tools for their multi-platform application development

Software AG Natural/Adabas
CA Ideal/Datacom and CoolGen
RPG, COBOL, and Synon
Green screen text UIs

- System z – CICS
- System z – IMS
- System z – Linux*
- System z – Batch
- System z – WAS*
- System z – VSE
- IBM i - WAS
- IBM i - Native
- AIX
- HP - UX
- Solaris
- Linux
- Windows

*Eligible to run on IFL and zAAP

But...

They are stuck on poorly supported, expensive, legacy development platforms

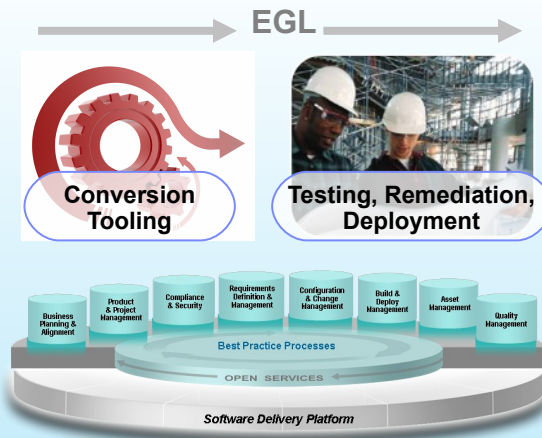

SHARE

Solution: Application transformation tools and services

Migrate from older languages and expensive tools to modern development platforms, languages, databases and tools

Software AG Natural/Adabas
 CA Ideal/Datacom and CoolGen
 RPG and COBOL
 Green screen text UIs

- System z – CICS
- System z – IMS
- System z – Linux*
- System z – Batch
- System z – WAS*
- System z – VSE
- IBM i - WAS
- IBM i - Native
- AIX
- HP - UX
- Solaris
- Linux
- Windows

*Eligible to run on IFL and zAAP

Delivering...

Greatly reduced development platform support costs, and more flexible, integrated development environment for making future application enhancements

Rational Migration Extension for Natural
Rational Migration Extension for CA
Rational Migration Extension for Rich UI
Rational Migration Extension for IBM i

UI Modernization with RME for Rich UI

Original Screens

Standard Transformation

- ✓ One to one screen to EGL RUI
- ✓ UI patterns mapping (list, detail, headers, message, etc)

Enhanced Transformation

- ✓ Combined UIs, improved flow, resizable panels, etc
- ✓ Combo boxes, radio buttons, date pickers, tabs, etc
- ✓ Mash-ups and integration with other systems

Boost productivity and accelerate innovation with modern skills

Modern IDEs for all platforms and languages

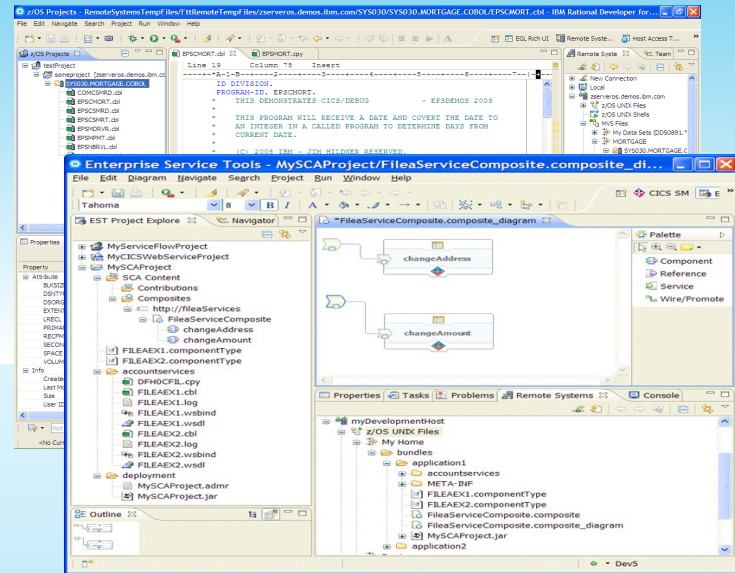

Modern business language

Enterprise training programs, communities and resources

Rational Software Delivery Platform
powered by 

Enterprises want to...

Increase productivity of their “backend” development staff, as well as attract new employees to this work

But...

They have antiquated development tools which deliver low productivity and are repulsive to younger staff

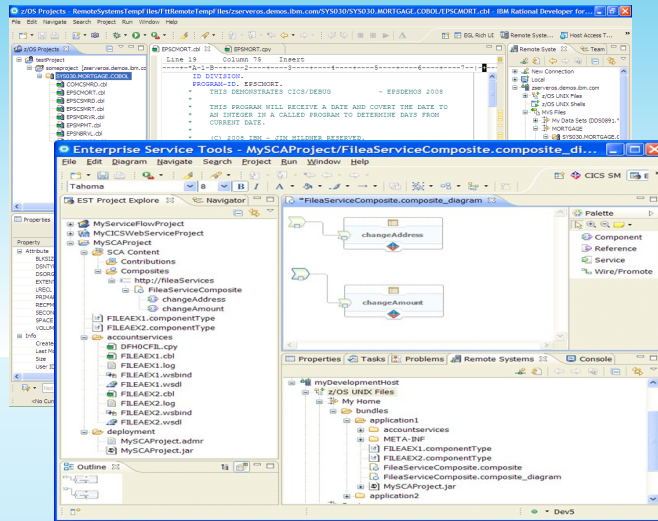

SHARE in Boston

Solution: Comprehensive, multi-platform IDEs

Upgrade to modern Eclipse-based tools to develop and maintain enterprise applications spanning multiple platforms, languages, and technologies

SHARE
Technology • Connections • Results

*Rational Developer for System z
Rational Developer for Power Systems **NEW!**
Rational Application Developer
Rational Business Developer
System z Solution Edition for Application Development*

Delivering...

50%-80%¹ reduction in host CPU usage with workstation syntax checking, ~15% improvement in developer productivity¹, and modern tools with which to attract new talent

SHARE in Boston

¹ Aggregation of results from a productivity study conducted by IBM System z customers

The original System z development environment

ISPF has provided consistent tooling for decades...but it is limiting

Challenges...

- Constant connection to mainframe is required
- Development shares processor with production use; gets lower priority
- Inability to create cross platform components
- ISPF green screen UI is unappealing to new hires
- MIPS used for development vs. production

Today's mainframe development environment with a modern IDE (and still some ISPF)

Modern IDEs add value

- Higher productivity; more attractive for new developers
- Ability to offload some development MIPS
- Integration with complete application lifecycle tools

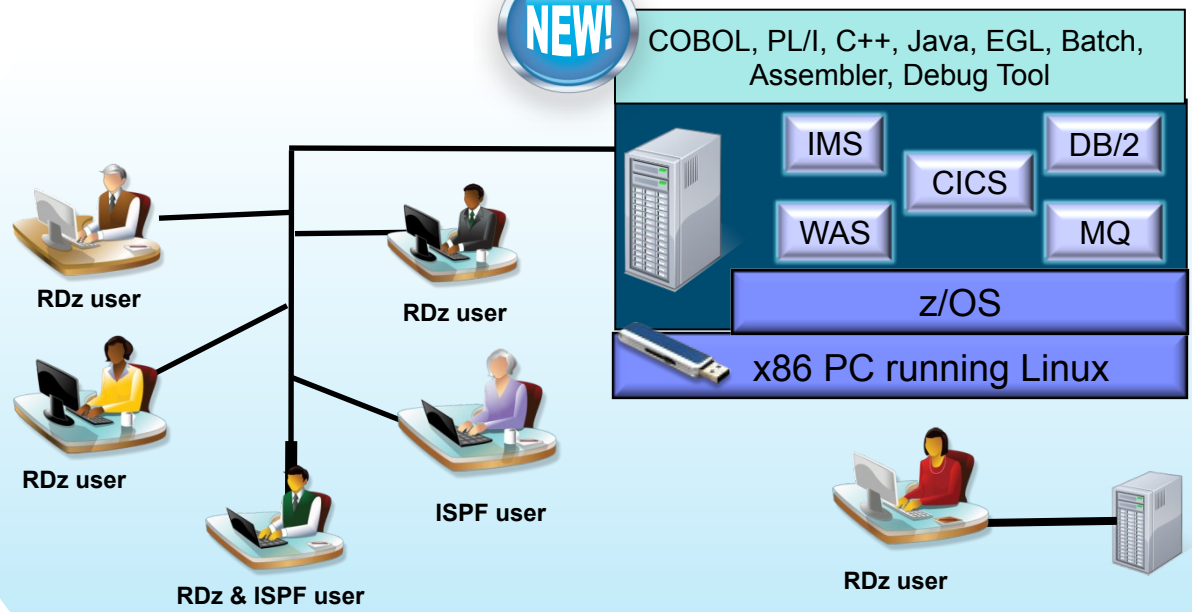

But challenges remain:

- Business pressures to reduce development MIPS further
- Test delays caused by dependencies on operations team, thus hurting productivity

Announcing the RDz Unit Test Feature

System z environment for testing on x86 Linux systems

NEW!

- Liberate developers to rapidly prototype new applications Develop and test System z applications anywhere, anytime
- Free up mainframe development MIPS for production capacity
- Eliminate costly delays by reducing dependencies on operations staff

Note: This Program is licensed only for development and test of applications that run on IBM z/OS. The Program may not be used to run production workloads of any kind, nor more robust development workloads including without limitation production module builds, pre-production testing, stress testing, or performance testing.

Enterprises want to...

Build modern, multi-platform applications with existing and new staff

SHARE
Technology • Connections • Results

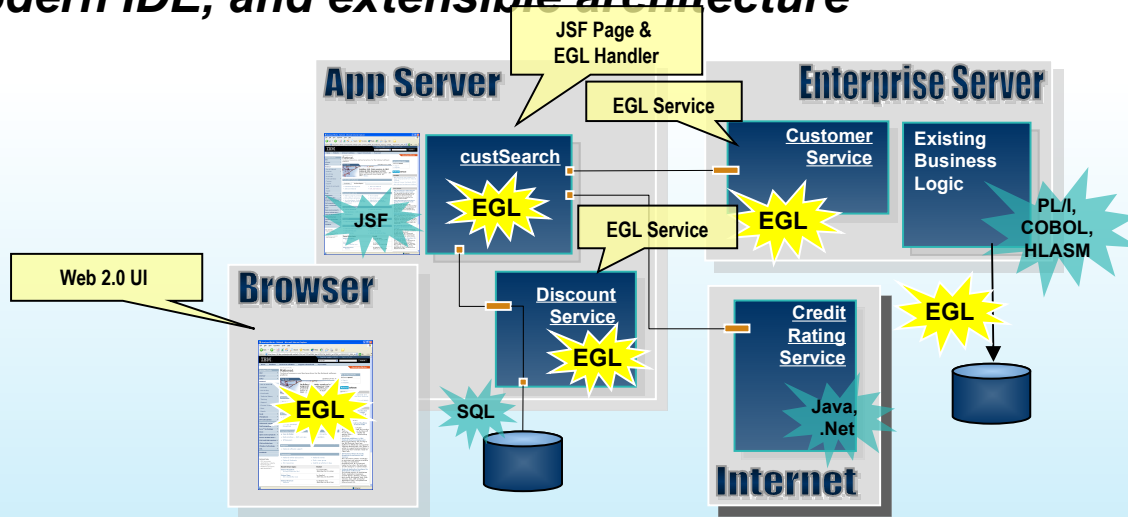

But...

They have different teams of developers for each platform, and re-training them to all the new technologies is costly, time consuming, and often impractical

SHARE in Boston

Solution: EGL – An open, modern business language

Build new or extend existing multi-platform enterprise applications in EGL with its middleware abstractions, high productivity language, modern IDE, and extensible architecture

*Rational Business Developer
Rational Developer for System z with EGL
Rational Developer for Power Systems* **NEW!**

Delivering. . .

High productivity, platform portability, and skills flexibility, for existing and new developers when building all types of modern enterprise applications

OPEN

Announcing
**Eclipse EGL
Development Tools Project**

An evolution in business application development

xact

- Open source project at Eclipse.org for the EGL language, compiler, source editing tools, debugger, and generators for Java and JavaScript
- Initial contribution based on technology in IBM Rational Business Developer
- Core EGL development by IBM and other participants in the open on Eclipse
- Project launched June 7, 2010

SHARE in Boston

Benefits of an open EGL ...

▪ Reduces risk

- ▶ Jointly developed in the open at Eclipse.org
- ▶ Source available under Eclipse Public License (EPL)

▪ Accelerates innovation

- ▶ Gives others (not just IBM) the ability to ...
 - Build tools that compliment the tools provided by IBM
 - Extend deployment to new runtime platforms
 - Add language extensions to support new concepts

▪ Broadens awareness and community

- ▶ Opens EGL to new audiences
- ▶ Gives others the opportunity to be involved in the planning and development process

Tools and solutions from IBM

- Rational Business Developer
- Rational Developer for z with EGL
- Rational Developer for i for SOA
- Rational Migration Extensions

IBM tools provide support for WebSphere Application Server, development of EGL JSF and TUI applications, generation of COBOL, and more ...
