

z/OS 1.11 Extended Status and SPOOL Browse: User Experience

James Lund – Computing and Information Services
Texas A&M University

March 4, 2011
Session Number 8663

Acknowledgements

Thanks to **Richard Peurifoy** (TAMU), **David Jones** (IBM JES3) and **Tom Wasik** (IBM JES2) for their valuable contributions to this presentation.

About the Speaker

- Texas A&M University '87 - Computer Science
- 20+ years working with MVS technology
- 15+ years at SHARE
- 10 years volunteering in the JES3/EPS Project

- JES3 Committee Lead under MVS Core Technologies Project

About the Company

- **Texas A&M University** formed in 1876 as Texas' first public institution of higher learning
- 46,000 undergraduate and 8,500 graduate students
- 250 degree programs
- 10 colleges – 6th largest enrollment in nation.

- Two branch campuses (Galveston, Tx and Doha, Qatar) and overseas centers (Mexico, Costa Rica, and Italy)
- George Bush (Sr.) Presidential Library/School of Government

Our Environment

- IBM z10 BC
- z/OS V1.11, JES3 V1.11
- Who are our customers?
 - Budget/Payroll System (BPP)
 - System-wide Financials (FAMIS) – 20+ universities and state agencies

The Condition

A concurrent move to a new z/OS and JES is difficult!

- 13 JES local mods
- 22 site-developed macros
- 4 local DSP programs
- 1 local FCT program
 - MUSAS functionality (Wylbur) - TSO too expensive at the time
- JES3 USERMOD required to implement - IATGRPT

- **We must clean this up! Let's start with DSPs!**

```

Step One: Out with the Old... DSPs

- Two DSPs awaiting requirements to be fulfilled
- **Output Status** DSP for print operators
- **Job Status** DSP for NOC operators
- Programs written pre OS/390 2.4 (ie. JES consoles, etc.)
- Handful of user code handed down throughout the years
- Susceptible to IBM's changing whims (of control blocks)!

Extended Status (SSI 80)

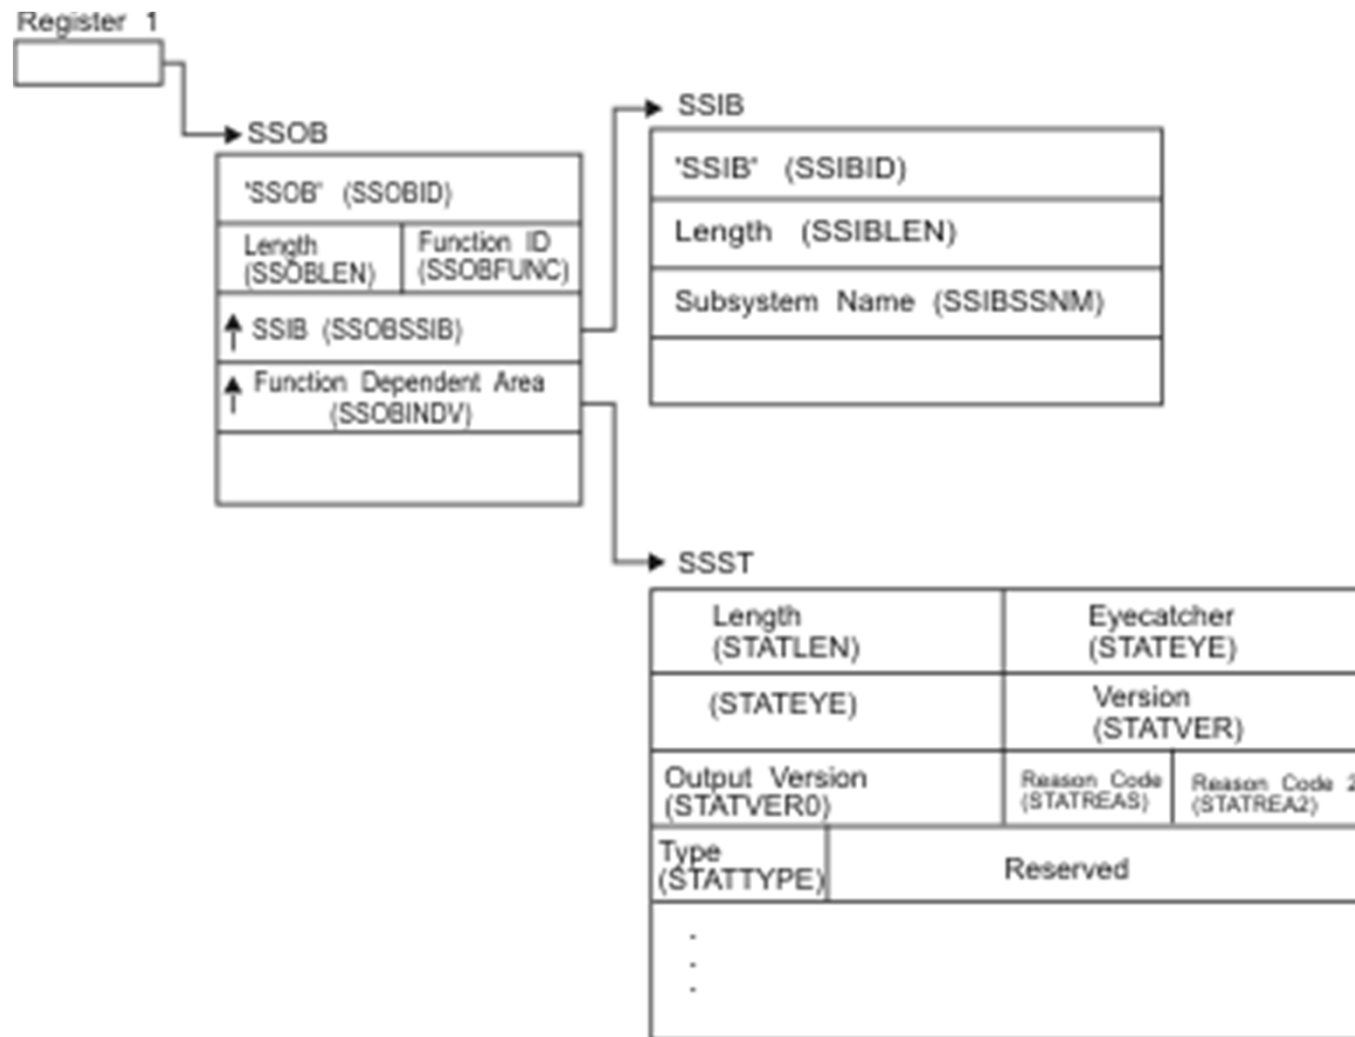

- *z/OS V1.11 MVS Using the Subsystem Interface (SA22-7642-09)*
- Detailed status information about jobs and SYSOUT in the JES queue
- The call is made in Problem State
- *Relatively* JES neutral
- Six Request Types (STATTYPE)
 - STATTERS STATVRBO
 - STATOUTT STATOUTV
 - STATDLST
 - STATMEM

Extended Status (SSI 80)

- Numerous combinations of filters
- Returned info from multiple calls will chain together without intermediate STATMEM
- Four types of Data Elements returned
 - SJQE - Job Queue Element (chained from IAZSSST)
 - SJVE - Job Queue Verbose Element (chained from SJQE)
 - SOUT - SYSOUT Element (chained from SJQE)
 - SSVE - SYSOUT Verbose Element (chained from SOUT and SJQE)

Environment for SSI 80 Call

Return for SSI 80 Call - STATOUTT

JES Properties (SSI 82)

- *z/OS V1.11 MVS Using the Subsystem Interface (SA22-7642-09)*
- Obtain information about JES managed structures (SPOOL, initiators, job classes, etc.)
- The call is made in Problem State
- *Relatively* JES neutral
- Request Types (SSJPFREQ)
 - SSJPSPOD SSJPSPRS
 - SSJPITOD SSJPITRS
 - SSJPJCOD SSJPJCRS

The Old... TAMIOSC Technique

Printer Status

- Search FCT chain for printer
- Obtain device status, WTR status, and job name, if applicable

Output Totals by FORMS

- Search OSE chain and build table

The Old... TAMDS77 Technique

Spool Status

- Search SPB chain for used and total tracks

Main Processor Status

- Search MPC chain

Device Status

- Search SUP chain

Queue Status

- Search JQE chain (IATXJQE) by priority

Active Initiators

- Search RSQ for Job number, Job name, Step, Region, etc.

Step Two: In with the New... Technique

Device Status

- Need SSI 83 - Available in z/OS 1.12

Output Totals by FORMS

- STATTYPE=STATOUTT
- STATSEL3=STATSNHL (non held jobs)
- STATSSL1=STATSSDS & STATSEDES='XEROX'
- STATSSL1=STATSSNH (non-SYSOUT held)
- Search STATJQ and STATSETR chain and build totals table

The Old... TAMDS77 Technique

- Spool Status
 - SSI 82
- Main Processor Status
 - Not sure this is available
- Device Status
 - Need SSI 83 - Available in z/OS 1.12
- Queue Status
 - Not sure this is available
- Active Initiators
 - SSI 80

What We Learned

- We need to get more current before we can continue
- What we were able work with is powerful and versatile
- Example program in the SSI manual is a good starting point
 - Might clean up the CALL section....
- STATPERF (IAZSSST) isn't set for JES3!
 - Can't measure the cost of running the SSI
- Job Owner vs Job Submitter?

Where Do We Go From Here?

- Get to JES3 V1.12 or better!
- Look forward to newer and enhanced SSIs
- Continue with JES mod elimination
 - Rewrite with SPOOL BROWSE and new SSIs to eliminate FCT
 - Rewrite other DSPs
