MVSS Project Opening

Russell Witt
CA Technologies

Monday, August 6th, 2012
Session Number 12059

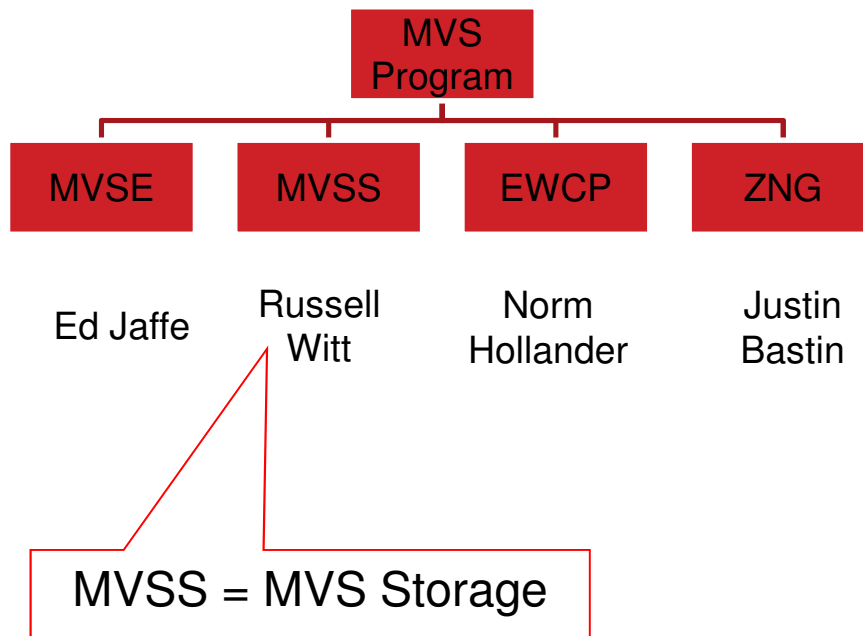

Our Purpose

The MVSS project focuses on the management of storage resources throughout the enterprise and the facilities necessary to provide these functions. In the z/OS environments, DFSMS and all of the DFSMS components and other vendor-developed (OEM) packages for providing these services are discussed. Among the many subjects covered are storage hardware supported by z/OS, access methods (including ICF/VSAM), ICF catalog topics and installation-developed tools and techniques. In the open systems arena we discuss storage-related aspects of USS, Tivoli Storage Manager on the z/OS platforms, Storage Area Networks, storage interfaces, and other open systems storage hardware and software issues. Topics that are addressed for all platforms are disaster recovery, data storage devices, data backup and archival systems and data integrity and recovery. The primary activities of the project are: quality IBM and user experience presentations at major SHAREs, requirements generation and prioritization and ad hoc task forces that influence IBM regarding future storage management directions by providing customer input.

Voting Share

Join our Tribe

- SHARE is a Volunteer organization
- Volunteer as a CHAIR –
 - You get the best seat in the house
- Submit a Requirement (your chance to get IBM to do something your way)
 - Better then asking as an individual
 - Chance to work with IBM and other clients to better articulate your request
- Submit a topic for a presentation
 - Call for Presentations for San Francisco is now open
