

Why Tape?

Understanding the Top Ten Perils of Going Tapeless

Wendy Johnson
Oracle StorageTek Enterprise Data Protection and
Mainframe Product Management

August 15, 2013
Session Number 13759

A modern data protection architecture is comprised of
disk and tape technology.

The strengths of disk and tape are combined to deliver
**lower risk of data loss,
faster access & restore,
and lower TCO**
than either technology can offer on its own.

What percent of data centers use tape for enterprise backups?

82%

Five big reasons explain
why 82% use tape as their
last line of defense

Source: Mark Peters, Enterprise Strategy Group, Inc. "A Comparative TCO Study: VTLs and Physical Tape,"

#1 Tape Has Much Lower Bit Error Rate Burden

Uncorrectable Bit Error Rate of Tape is 10,000 Times Lower Than Disk

Seagate
Constellation ES.2
Hard Drive

How many petabytes
are transferred before an
uncorrectable error?

Enterprise
Tape Drive

Assumes 1:1 compression and sustained data rate of 155 MB/s for Constellation ES.2 and 240 MB/s for T10000C

#1 Tape Has Much Lower Bit Error Rate Burden

Uncorrectable Bit Error Rate of Tape is 10,000 Times Lower Than Disk

Seagate
Constellation ES.2
Hard Drive

Disk: 0.1 PB

Enterprise
Tape Drive

Tape: 1,110 PB

Assumes 1:1 compression and sustained data rate of 155 MB/s for Constellation ES.2 and 240 MB/s for T10000C

#1 Tape Has Much Lower Bit Error Rate Burden

Uncorrectable Bit Error Rate of Tape is 10,000 Times Lower Than Disk

Seagate
Constellation ES.2
Hard Drive

How long
is data transferred before
an uncorrectable
error?

Enterprise
Tape Drive

Assumes 1:1 compression and sustained data rate of 155 MB/s for Constellation ES.2 and 240 MB/s for T10000C

#1 Tape Has Much Lower Bit Error Rate Burden

Uncorrectable Bit Error Rate of Tape is 10,000 Times Lower Than Disk

Seagate
Constellation ES.2
Hard Drive

Disk: 9 days

...equivalent to **40**

*RAID recoveries
per year
per disk!*

Enterprise
Tape Drive

Assumes 1:1 compression and sustained data rate of 155 MB/s for Constellation ES.2 and 240 MB/s for T10000C

#1 Tape Has Much Lower Bit Error Rate Burden

Uncorrectable Bit Error Rate of Tape is 10,000 Times Lower Than Disk

Seagate
Constellation ES.2
Hard Drive

Disk: 9 days

Enterprise
Tape Drive

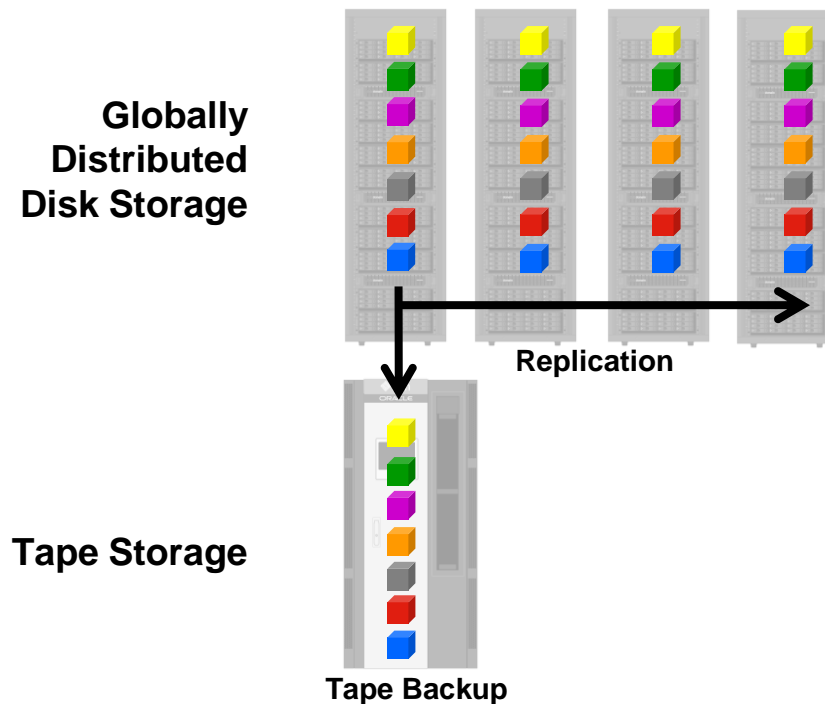

Tape: 165 Years

Assumes 1:1 compression and sustained data rate of 155 MB/s for Constellation ES.2 and 240 MB/s for T10000C

#2 Tape is Decoupled From Corruption Sources

Google Recovered Thousands of Corrupted Email Accounts Using Tape

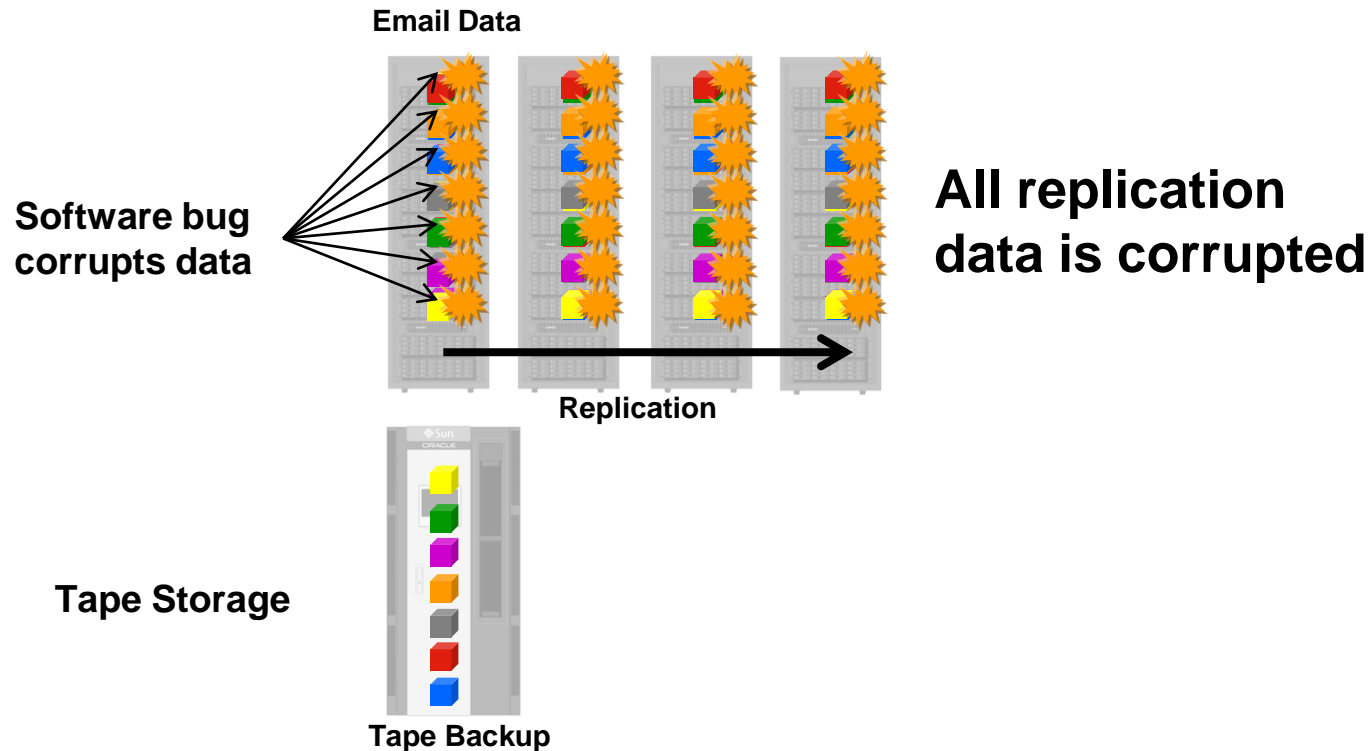

#2 Tape is Decoupled From Corruption Sources

#2 Tape is Decoupled From Corruption Sources

Web Hosting Company Fails to Recover from 30 Minute Hack Attack

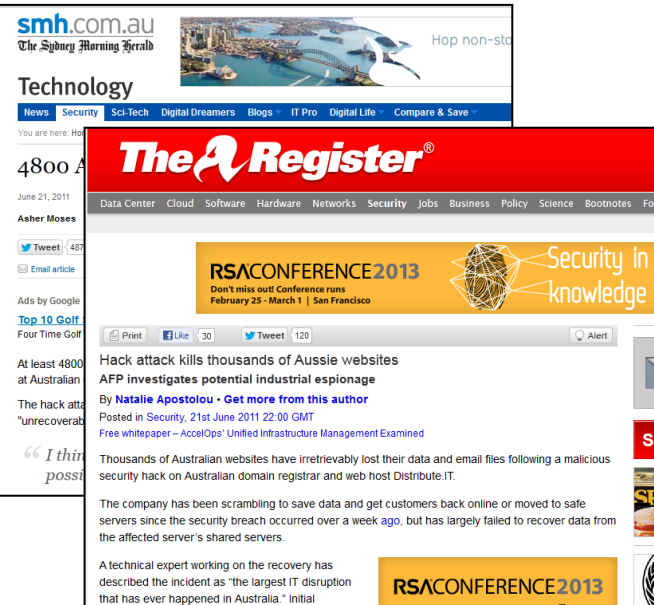

At least 4800 Australian websites have been lost with no chance of recovery following a break-in at Australian domain registrar and web host Distribute.IT.

#2 Tape is Decoupled From Corruption Sources

Web Hosting Company Fails to Recover from 30 Minute Hack Attack

“Our greatest fears have been confirmed that not only was the production data erased during the attack, but also key backups, snapshots and other information that would allow us to reconstruct these Servers from the remaining data,” the company said in its last blog post.

#3 Tape Does Not Deduplicate Data

Data Loss Events with Deduplication Can Be Catastrophic, Not with Tape

Deduplication

With Deduplication

**One Error Can
Create Many
Errors**

Tape

With Tape

**One Error is
One Error**

#4 Tape is Environmentally Robust

Rest Easy Knowing Tape Data is Safe In Nearly Any Extreme Scenario

Safer from cooling outages
Safer from electrical surges
Safer from earthquakes
Safer to move quickly

#5 Data Integrity Is Easily Validated with Tape

Disk Systems Lack Simple Means of Validating Integrity of Backup Data

What is the integrity
of disk backups that are
weeks, months, or years old?

#5 Data Integrity Is Easily Validated with Tape

Disk Systems Lack Simple Means of Validating Integrity of Backup Data

Enterprise tape drives perform

data integrity validation,

providing reassurance that backup files are ready to restore.

Enterprise Tape Drives
CRC checks any file, any time

How many cartridges does it take to prove the reliability of tape?

This is what happened when NERSC read nearly
24,000 cartridges or
approximately **15 million meters of tape...**

99.945%

of cartridges were read 100% error free

Source: Mark Peters, ESG Technology Brief, <http://www.oracle.com/us/corporate/analystreports/corporate/esg-nersc-case-study-202702.pdf>

Tape Technology Marches Forward

Storage Capacity Then... and Now

10 TB in 1996

- 6000 carts
- Timberline 9490 – 1.6 GB

... and in 2011

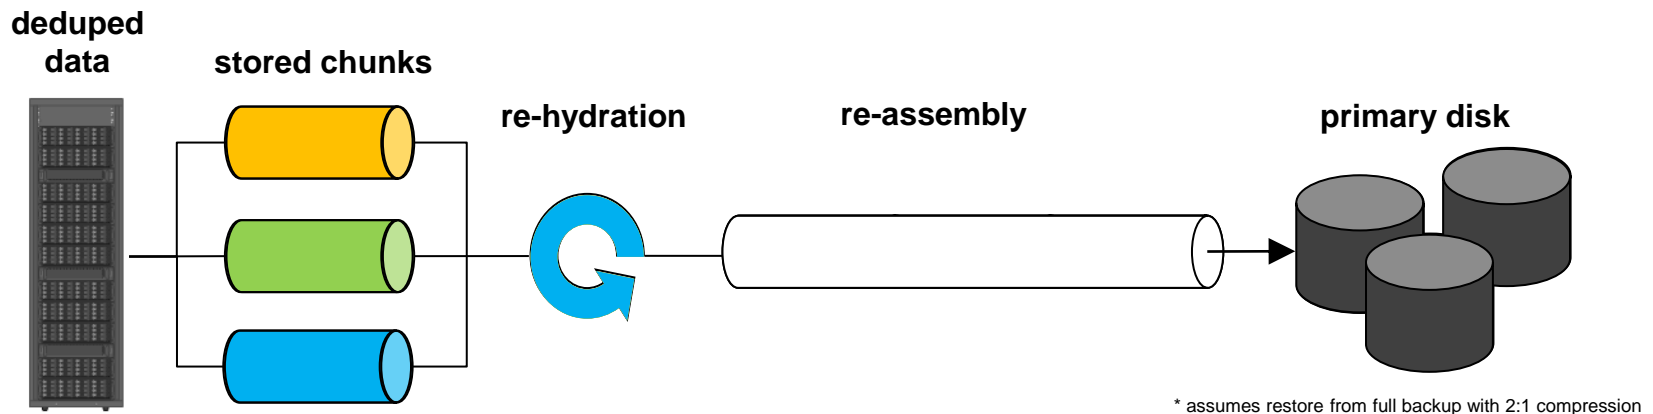

- 2 carts
- T10000C – 5.0 TB

#6 Massive Restores are Predictable With Tape

Tape Restores Are Not Slowed By Multi-Step Re-Construction Process

Restores from disk depend on:

- number of stored chunks
- actual dedupe ratio of data
- number of re-hydration nodes (usually one)
- additional workload on deduped disk
- disk storage utilization

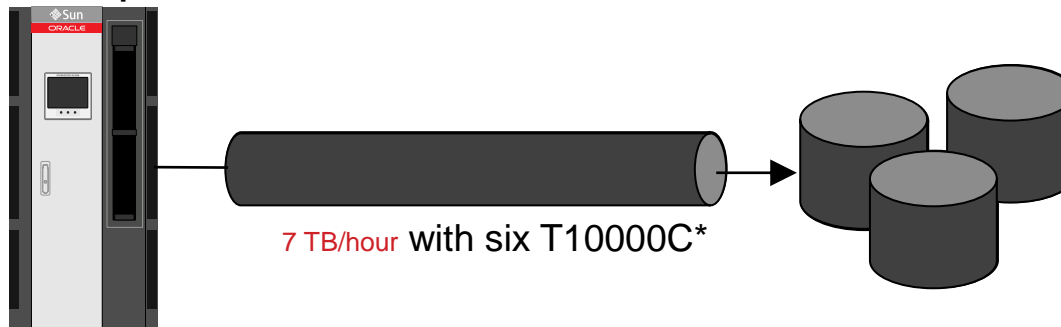

#6 Massive Restores are Predictable With Tape

Tape Restores Are Not Slowed By Multi-Step Re-Construction Process

Tape delivers

predictable restores
by streaming a complete backup

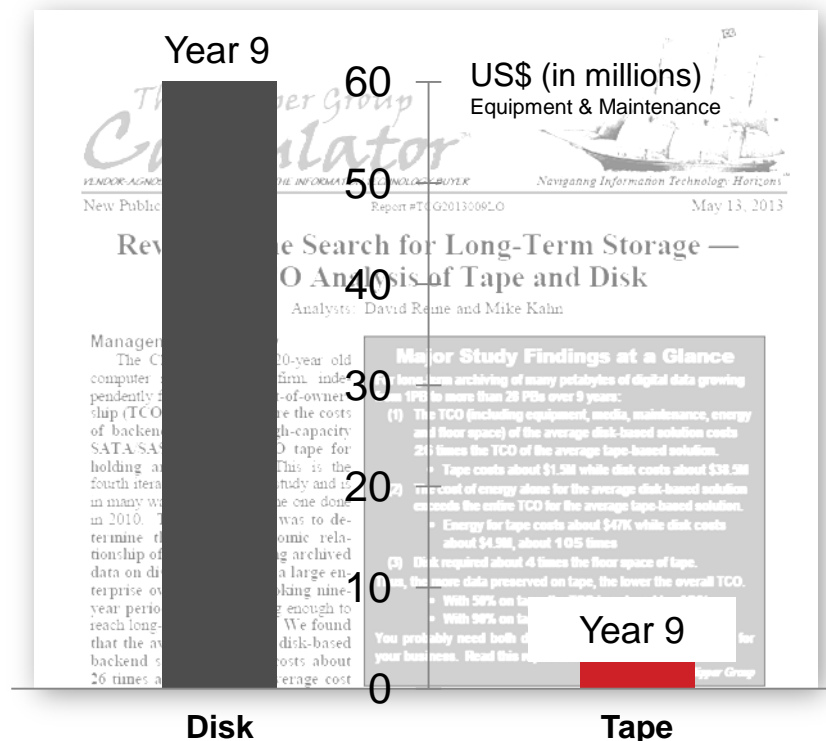

**complete
backup**

* assumes restore from full backup with 2:1 compression

#7 Tape Systems Cost Less Than Disk Systems

NEW Study Concludes Disk Costs 26 Times More Than Tape Solution

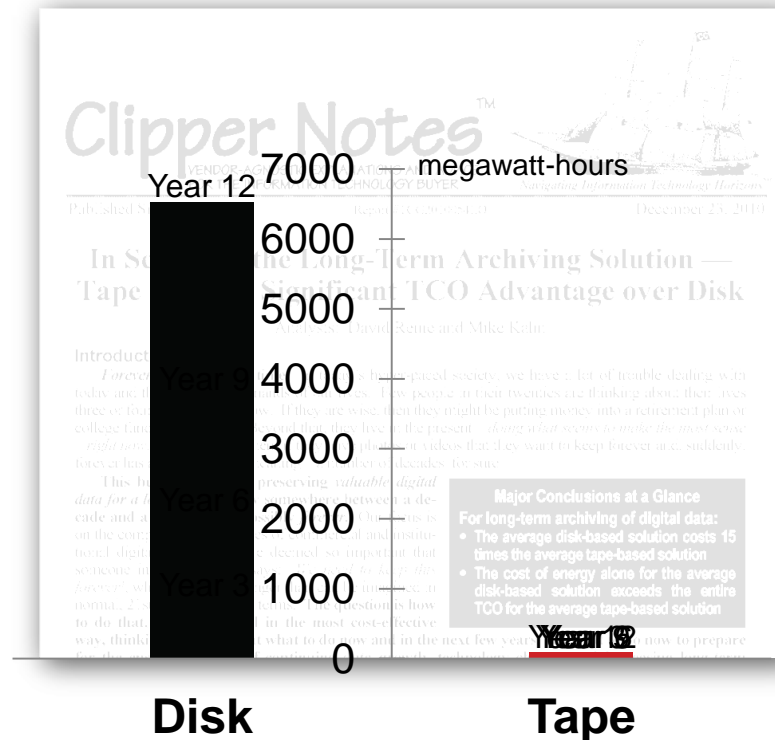

Source: The Clipper Group,
<http://www.oracle.com/us/corporate/analystreports/industries/clipper-tco-storage-2013-1959019.pdf>

Study compares a 1 PB archive growing at 45% annually for 9 years on disk and tape.
Assumes 1:1 compression.

#8 Tape is Green

Study Concludes Disk Uses 75 Times More Energy Than Tape Solution

Source: The Clipper Group,
<http://www.oracle.com/go/?&Src=7011670&Act=123&pcode=WWMK10035489MPP034>
Study compares a 3 PB archive growing at 45% annually for 12 years on disk and tape.
Assumes 1:1 compression.

#8 Tape is Green

Study Concludes Disk Uses 75 Times More Energy Than Tape Solution

In 12 Years, tape solution saves over

6,000 megawatt-hours

of electricity

... eliminating more than

4,000 metric tons

of CO₂ emissions

... saving more than

\$4 Million

in electricity costs

#9 Tape Lowers Cost and Complexity of Growth

Tape Enables Huge Savings and Simplifies Capacity Scaling

Assumptions: 400TB in Year 1, 20% growth per year, full copy per year retained 5 years, 10 TB/hr backup and recovery, 6:1 dedupe ratio for disk, 2:1 compression ratio for tape. Based on list pricing for equipment and maintenance.

#9 Tape Lowers Cost and Complexity of Growth

Tape Enables Huge Savings and Simplifies Capacity Scaling

Capacity scaling with tape

costs 93% less

...and adding tape cartridges is

much simpler

than adding more disk appliances

Assumptions: 400TB in Year 1, 20% growth per year, full copy per year retained 5 years, 10 TB/hr backup and recovery, 6:1 dedupe ratio for disk, 2:1 compression ratio for tape. Based on list pricing for equipment and maintenance.

On average, a single administrator can manage
100 terabytes of disk data
or
multiple petabytes of tape data

Let the data speak!

Classifying data into disk and tape tiers enables

**lower risk of data loss,
faster access & restore,
and lower TCO**

than either technology can offer on its own.
