What will be covered

- Credit Cooperativism
- What is Sicoob?
- Brazilian Financial System
- Challenges
- Concepts and Sicoob Cloud Project
- Efforts
- Sicoob Cloud Reference Architecture
- Business Technology

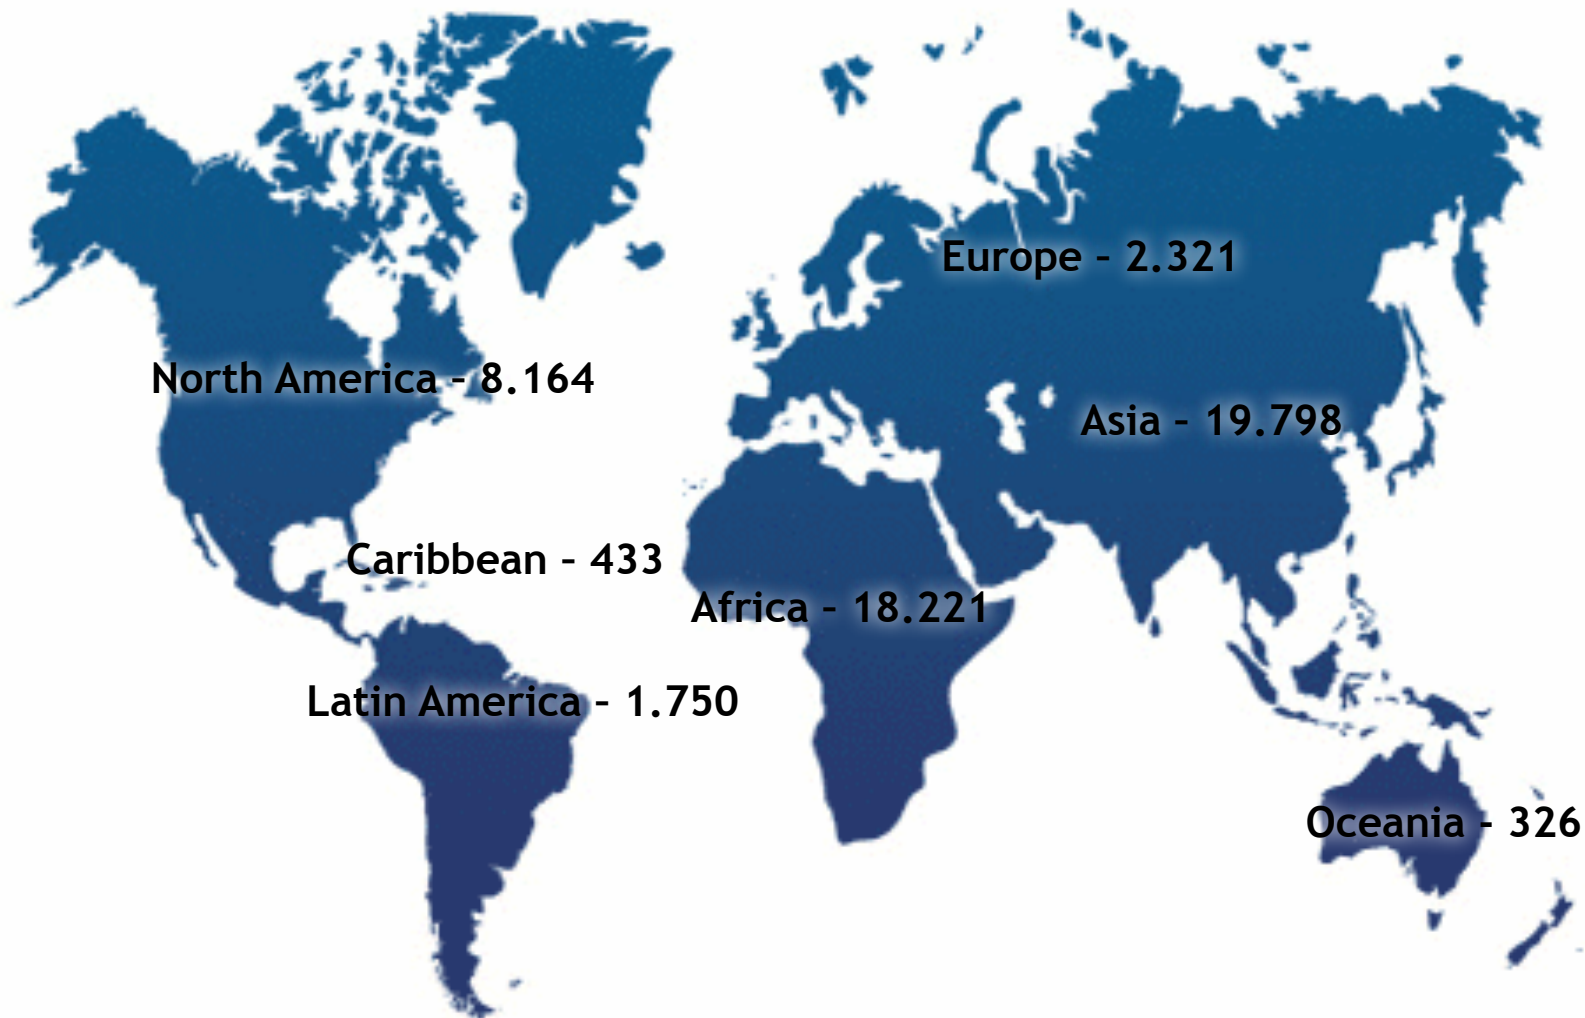

Credit Cooperativism

- What is a Credit Cooperative?
 - It is an association of people who seek through mutual assistance, to make a better management of their financial resources.
 - The purpose of the Credit Cooperative is credit cooperation, to provide banking services to its members with more advantageous conditions.

Credit Cooperativism around the world

Credit Cooperativism in Brazil

- Credit Cooperatives in Brazil

In Brazil, Credit Cooperative is treated in the same way as any financial institution (Law number 4595) and all operations must be authorized and regulated by the Central Bank of Brazil.

 - Internet banking - 119%
 - ATM - 22%
- Total transactions processed at the core banking - 57%
- Credit transactions volume - 83%
- Debit transactions volume - 127%

Overview of Sicoob's IT Infrastructure

- Primary Site

All systems and platforms that compose the major bank core systems are developed In-house

- 2 Mainframes z196 / 1 zEC 12*
- 2 Storages DS8700/8800
- 1 Tape Library TS3500
- 6 High-End Intel Servers + 1 New*
- 17 Middle Range Servers
- 4 Directors SAN

- Secondary Site

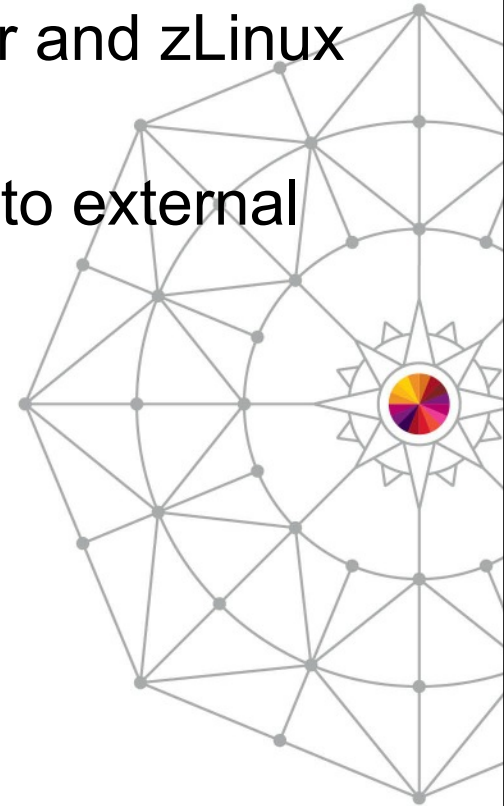

- 1 Mainframe z10
- 1 Storage DS8700
- 1 Tape Library iScalar
- 1 High-End Intel Servers
- 3 Middle Range Servers
- 4 Directors SAN

Curiosities

- Sicoob is the 2nd major user of IFL processor and zLinux OS in the world (153 IFLs and 530 VMs)
- Sicoob is the first bank in Brazil to offer IaaS to external clients using his own Data Center

What about the cloud?

- Before talking about the cloud project at Sicoob we have to explain the environmental forces which affect our strategies. These 03 driving forces:
 - Changing Global Financial System
 - Changing National Credit Cooperativism
 - IT Trends

Brazil economics and financial overview

- Today's snapshot – Market Retraction
- Inflation growth
- Low projection of the PIB Growth
- Increasing of the Risco Brazil
- Dollar growing

Banks are having to do more with less

Perspectives of the financial market

- Government pressure on credit offerings.
- Operational profit margin reduction trend.
- Expansion of Products and Services portfolio.
- Bringing in new customers.
- Expansion of service network.
- Reduction in operational and administrative costs.
- Intensification of new technologies used in product creation and delivery.
- BASEL III regulatory framework

National credit cooperative system

- In the last 10 years the cooperative movement has faced a large growing.
- Nowadays, the system is challenged to foster another big wave of evolution and to become more competitive in the banks' s market place.

Cooperativism challenges

- 1** Customer loyalty
- 2** Expanding the range of action in Metropolitan areas
- 3** Systemic attitude
- 4** Offer a competitive wide range of products and services

National credit cooperative system

“To advance and make a difference as a system in the cooperative world as well as in the National Financial System it is important to practice the preamble of Complimentary Brazilian Law concerning the creation of a National Credit Cooperatives System.”

**National Credit
Cooperatives System**

□ Sem cobertura (3915)

IT & Cloud Computing

Executive Point of View - Sicoob

“IT isn’t anymore a cost center but an investment line. Invest in IT and collect benefits and direct revenue.”

=

Ricardo Antônio
CIO
Sicoob

Sicoob Cloud Computing Project

Insert a new concept of IT management, and a new organizational culture based on maturity of processes, focusing in quality improvement, in order to prepare Sicoob for the future, achieving high levels of businesses and services delivered in the financial world market.

Industrialization

“Standardization of IT services through a highly automatized pre-defined and pre-set solutions, repeatable, scalable, reliable to meet the needs of the organization.”

Gartner

“Industrial models require the abolition of pure artistry of technology and move into a business engineering mentality.”

FORRESTER

Servicizing

“**Servicizing** is a transaction through which value is provided by a combination of products and services in which satisfaction of customer needs is achieved by selling the **function** of the product rather than product itself, or by increasing the service component of the offer.”

Servicizing philosophy involves the concern about the quality, the client service, the customization of operational attitudes seeking new clients fidelity and customer satisfaction.
