Dynamic Data Center: Business Solutions on Demand

No better time to be on the MAINFRAME

The Dynamic Data Center

Evolving Role of System z

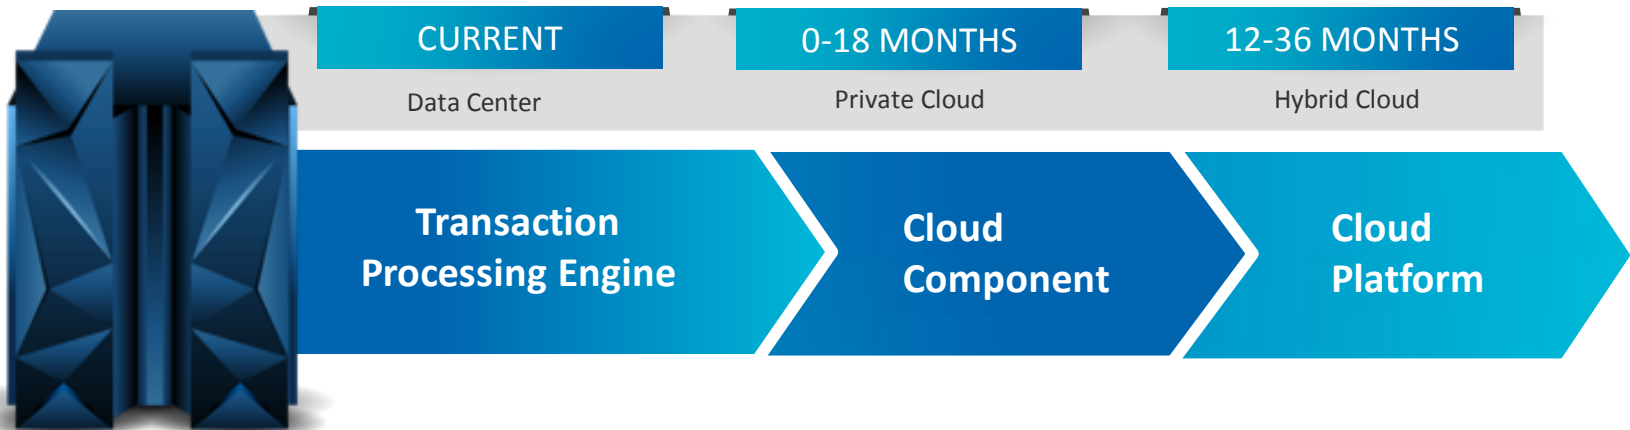

DYNAMIC DATA CENTER

Infinitely Scalable

Dynamically expand and contract

Spans across platforms

Rapidly adapts

Evolving the Dynamic Data Center

DEVELOPMENT

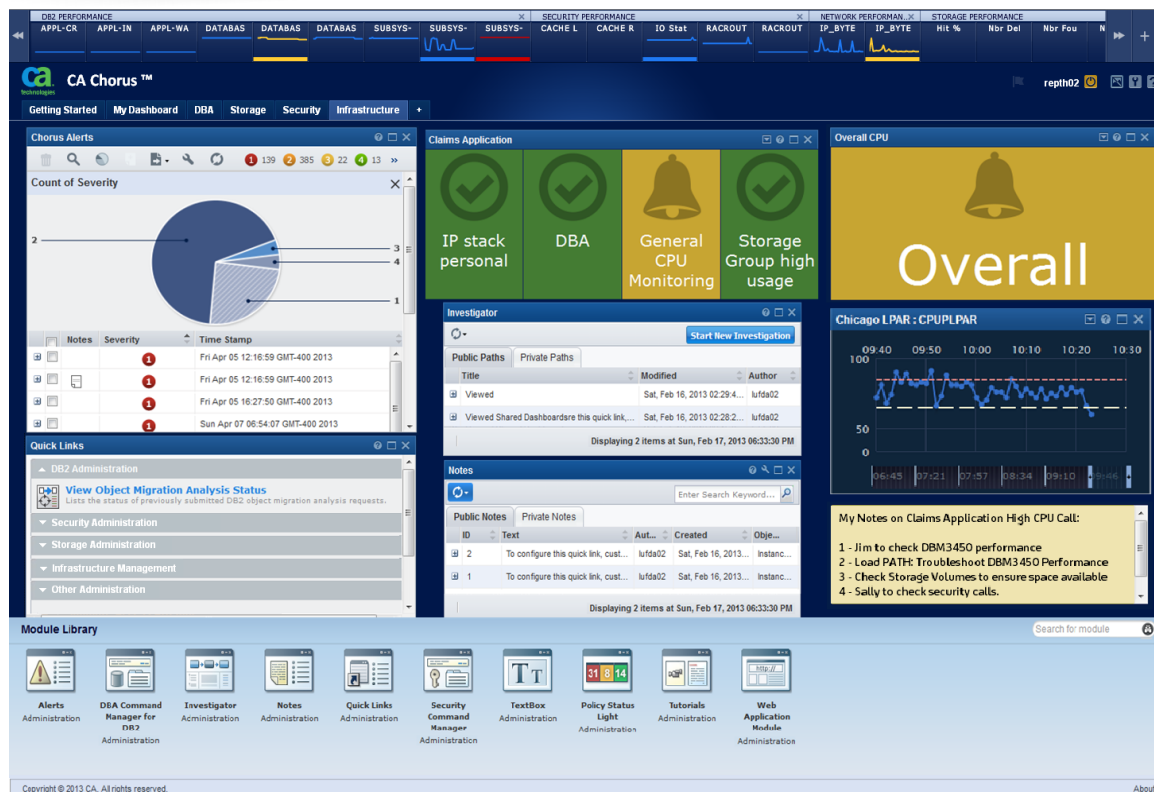

OPERATIONS

Dynamic IT Management

CA Chorus™

DEFINITIVE MANAGEMENT TOOL FOR THE DYNAMIC DATA CENTER

INCREASE EFFICIENCY
using integrated workspace

SOLVE PROBLEMS FASTER
with graphical diagnostics

ACCELERATE LEARNING CURVE
through knowledge capture

REDUCE ERRORS AND RISK
with proactive analytics and automation

CA Chorus™ It's all about results for you and your business

See the video

Workload Portability and Agility

CA Workload Automation

Dynamic DevOps Strategy

Integrated for Continuous Development and Deployment

Empowering the Dynamic Data Center

CA Vision and Roadmap Themes

Unified Automation strategy

CA Delivery Framework

Infrastructure SIMPLICITY

Maximize platform value

Accelerate software deployment

Simplify software management

Facilitate collaboration & knowledge transfer

Automate and integrate across IT disciplines

Enterprise VISIBILITY

End-to-end security

End-to-end data center auditing

End-to-end performance management

End-to-end application development & management

Automate and integrate across platforms

Management FLEXIBILITY

Mobile access to management functions

Management from/to any platform

Private & hybrid cloud enablement

3rd party integration via SDK

Data analytics enablement

Workload PORTABILITY

High availability infrastructure

Disaster recovery & business continuity

Policy-based placement & control

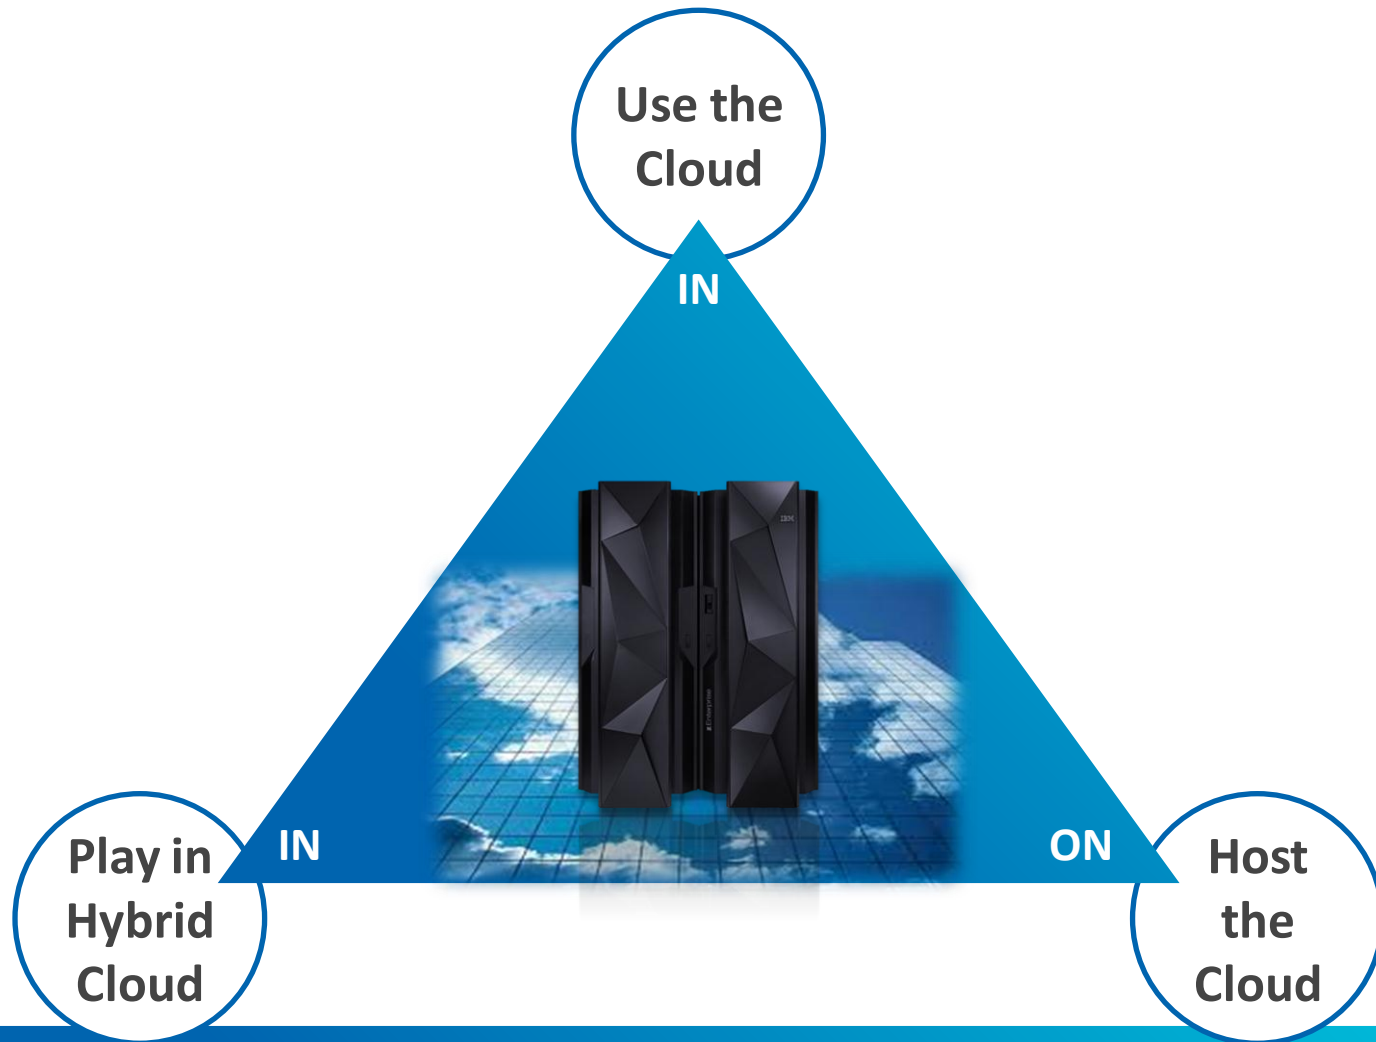

Continuous development & deployment

Open-Stack support for interoperability

High Availability strategy

The Mainframe and the DDC “On and In”

Making the Mainframe more Mainstream

Just because the Mainframe is Exceptional, doesn't mean it needs to be an Exception

Cloud Deployment and Management

CA AppLogic for System z

Full Lifecycle Management of System z Cloud Services

PROVISION

Accelerate System z cloud deployment

Increase responsiveness

DE-PROVISION

Quickly locate and remove instances

Increase efficiency

MANAGE

Simplify management of cloud applications

Reduce cost

CONNECT

Easily connect to z/OS transactions and databases

Increase performance and reduce risk

Simplify Linux on System z and accelerate mainframe cloud

CA AppLogic® for System z

The screenshot displays the CA AppLogic interface. The top window shows the 'Instance Settings' for 'web64', with a table of resource limits:

Resource	Min	Max	Default
CPU (num)	0.10	16	0.30
Memory (bytes)	160M	32G	512M
Bandwidth (bits/sec)	1M	2G	250M

The bottom window shows the 'Application Editor' for 'AMC_CustomerDemo'. It features a network diagram with three zones: 'Public Zone', 'Application Zone', and 'Data Zone'. The diagram includes components like 't3b' (load balancer), 'web64' (web servers), 'db' (database servers), and 'http' (application servers) connected by network links.

Quickly design, provision and manage cloud applications on System z

Reduce costs and increase efficiency

- Host thousands of Linux on System z applications on a single zEnterprise server
- Replaces need for hundreds of distributed servers and their required network fabric

Easily connect to z/OS transactions and databases

Self-service provisioning on System z combines cost reduction and agility with massive scalability and reliability

Cloud Services

CA LISA® Service Virtualization

Remove Constraints for Faster Development and Testing, Lower Costs and Better Quality

INCOMPLETE DEVELOPMENT

"I have everything I need, when I need it!"

Application Visibility

CA Cross-Enterprise Application Performance Management

Innovate Through Cross-platform Visibility

End-to-end Application Visibility – Anytime, Anywhere

Get the right information to the right people

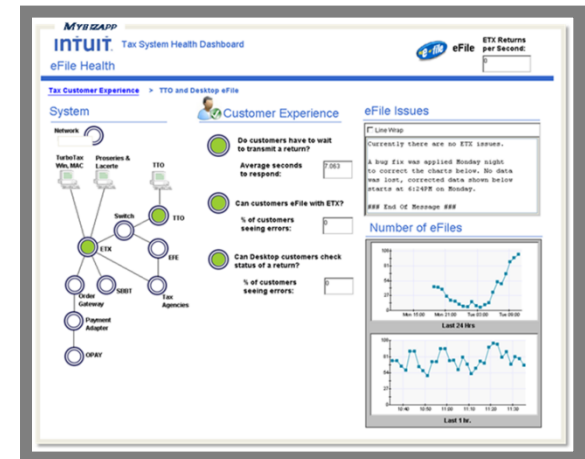

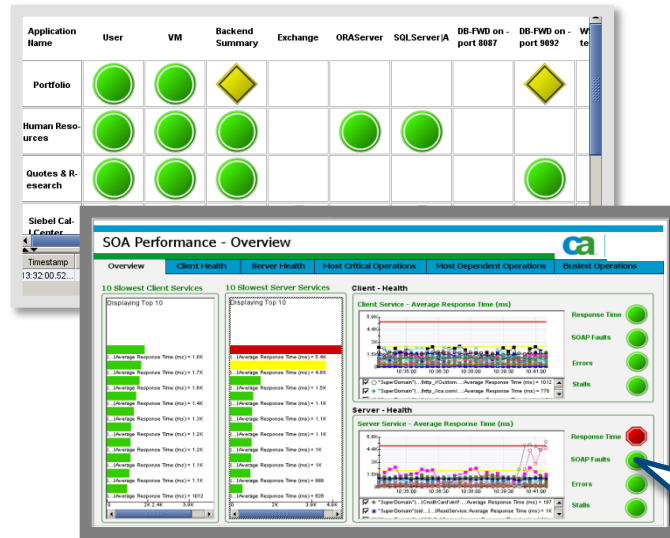

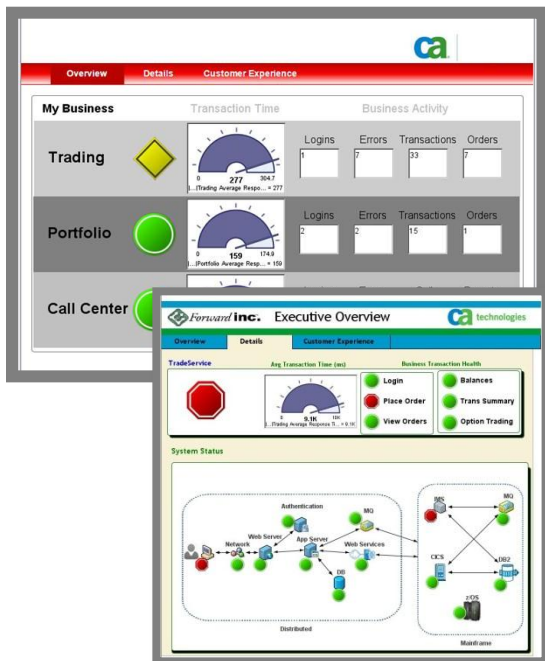

- I need visibility into the customer experience
- What's the number of orders that are processed daily?

- I want to see problems before customers do
- I want a constant pulse on customer success rate
- I need to know who to contact when alerted

- I must ensure SLAs are acceptable
- Is my team working efficiently and are our costs under control

Share a single source of application performance truth - in a format friendly to each audience

The Dynamic Data Center

Summary

Private Cloud

Hybrid Cloud

Public Cloud

CA Chorus

- Unified workspace
- knowledge management
- Data and functional integration

Flexibility to Support any Datacenter Deployment

Cross Platform Solutions

- Mainframe, distributed, cloud, mobile
- Workload portability and visibility
- DevOps

Extend to Support New Cloud Environments

Next Generation

- Cloud services
- Big Data and analytics
- Application modernization

Embracing Next Generation Cloud,
Big Data and Infrastructure Management

CORE FOCUS ON EXCEPTIONAL CUSTOMER EXPERIENCE

Why

be dynamic?

What

is it?

How

do I get there?

The Dynamic Data Center

Get Dynamic. Get Results.
