Abstract

Times have changed. Where jobs were once plentiful and it was easy to keep the job you already had, now most people will find themselves laid off at least once in their career. Even if you survive that, dramatic changes in the industry mean that the job you have may no longer work for you. With unprecedented competition for jobs, having an 'edge' in the interview can mean the difference between landing the job you want for the pay you desire or being an also-ran. And the skills you will learn here will also help you understand better how to negotiate terms at your present job, such as getting raises and promotions.

3. Be Clear

“So many people out there have no idea what they want to do for a living, but they think that by going on job interviews they’ll magically figure it out. If you’re not sure, that message comes out loud and clear in the interview.”
