

Session 17902

## Common problems and problem determination for MQ z/OS

Lyn Elkins – [elkinsc@us.ibm.com](mailto:elkinsc@us.ibm.com)

Mitch Johnson – [mitchj@us.ibm.com](mailto:mitchj@us.ibm.com)

SHARE is an independent volunteer-run information technology association that provides education, professional networking and industry influence.

## QR Code for this Session

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

8/13/2015

## Agenda

- MQ Detectives – Problem Determination
- “My application failed”
  - Gathering available information.
  - Creating additional diagnostic data.
- “My message is missing”
  - Message tracking techniques.
    - Locating a message in a simple system.
  - Advanced message tracking.
    - Identifying message delivery routes.
    - Delayed messages.
- How to avoid problems.

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

# MQ Detectives – Problem Determination

1 0 0 1  
1 0 0 0 1  
0 0 1 0 0 1  
0 0 0 1 0 0 1  
1 0 0 1 1 1 1 0  
0 0 1 1 1 0 0 1 1 0 1  
1 1 1 1 0 1 0 0 1 1 0 1

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Problem Determination Methodology

- Problems are different on many levels:
  - How they manifest
  - The circumstances under which they occur
  - The ways in which they can be addressed
- The way of determining root cause is fairly common:
  - The problem occurred
    - Don't disturb the crime scene
    - Bag and tag the evidence
  - Ask questions
  - Follow the evidence
  - Build a hypothesis that is supported by the facts

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Problem Determination Methodology – cont'd

- Problem path or sequence of events → “The time line”
  - Many options, some are normal, one is the error path

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Problem Determination Methodology – cont'd

- 2 types of scenarios:
  1. The outcome is known (for instance an abend)
  2. The trigger is known (for instance putting a given message to a particular queue)

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Problem Determination Methodology – cont'd

- Starting point → symptoms!

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Problem Determination Methodology – cont'd

- Symptoms – what can you see?
  - “My message is missing”
  - “My application did not receive a message on the reply queue within 10 minutes”
  - “The queue manager hangs”
  - “The queue manager is not responding to console commands”

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Problem Determination Methodology – cont'd

- Experience:
  - Identify blind alleys early on
  - Reveal new paths you would not have considered
  - Prioritize what to spend time on

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Problem Determination Methodology – cont'd

- Story
  - Following the trail backwards is easy, but difficult to communicate

- It is all about telling the story forwards
- Telling it both ways is a good way to validate every aspect has been understood

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

**SHARE**  
in Orlando 2015

## Problem Determination Methodology – cont'd

- Questions:
  - Has something changed in your system?
  - Look at the wider environment
  - Has this worked in the past?
  - Was there anything unusual at the time of the problem (high workload, network blip, system outage ...)
- Spend time looking at the possibilities before doing any deep digging down a given path
- Look up every now and then to see if this is the right path to go down

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Problem Determination Methodology – cont'd

- Insufficient documentation?
  - Think about what the information would provide before requesting it
- Be prepared!
  - Install CCTV and alarm
    - set trace, monitoring, dump capture and suppression
  - Know what your system looks like normally
    - Spot the difference when something has gone wrong

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

“My application failed”

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Ask the user and application owner

- What were they doing?
  - Which application, queue manager and queue?
  - Was this normal processing, or something unusual?
- What went wrong?
  - Get specific details.
  - Any error messages?
  - Did itabend?
- What was the expected result?
- When did it happen?
  - Only once
  - Repeatedly over a period
  - Still occurring

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Application symptoms – bag it and tag it!

- MQ provides details about failures to the application
  - Specific reason codes
- Check application error logs
  - Detailed error reports are a big help
    - “Application failed” - Unhelpful
    - “Error opening queue with completion code 2” – Slightly better
    - “MQOPEN failed with reason 2059 for APP1.REPLY” – Good
- Applications can have multiple components
  - Web page – servlet – EJB – JMS – MQ API
  - Errors may be reported in several places
    - Or not reported at all

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## MQ error reporting

- MQ MSTR and CHIN tasks hold diagnostics for some errors
  - Messages in joblog  
CSQM067E: Intra-group queuing agent ended abnormally.

- Task abends
  - Abend code x'5C6' or x'6C6'
  - Reason code identifies cause
  - 5C6-00C90700 M=CSQGFRCV,LOC=CSQILPLM.CSQILCUR+00000302

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## GTF trace

- MQ uses z/OS GTF trace facility for diagnostic trace.
- API trace and internal trace
  - 5E9 – API entry
  - 5EA – API exit
  - 5EE – Internal trace
- Trace data written to wrapping dataset
- IPCS formatting required to produce readable output.

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## GTF trace cont'd

- Start GTF

```
START GTF.DB
$HASP100 GTF.DB ON STCINRDR
$HASP373 GTF.DB STARTED
*01 AHL100A SPECIFY TRACE OPTIONS
R 01,TRACE=JOBNAMEP,USRP
TRACE=JOBNAMEP,USRP

## Capturing a dump

- z/OS system dumps are an important tool for capturing system state at the time of an error.
- Dump may have already been captured.
  - MQ 5C6 abends
  - Application requested dump
  - Other z/OS components
- Several methods to generate a dump for a failure
  - Console DUMP command
  - SLIP trap
  - RECOVER QMGR(MQRD,2051,1)
- MQ Dump formatters CSQWDPRD and CSQXDPRD

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## “My message is missing” Message tracking techniques

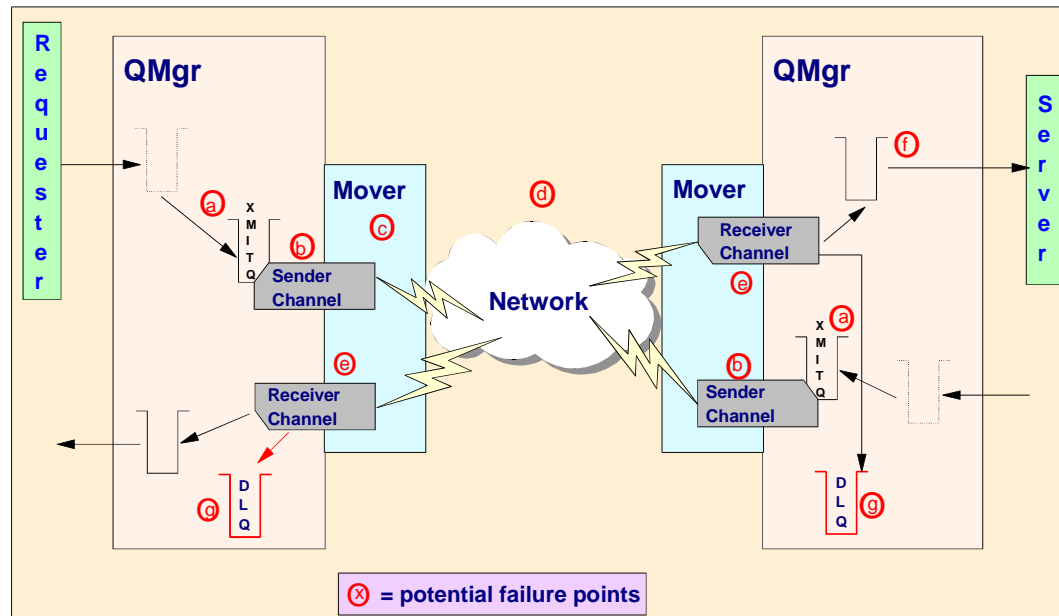

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Where might it have gone wrong?

- A simple request/reply application

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## What happened to the message?

- There may be many reasons why a message could be removed from MQ.
  - Was the MQPUT successful?
  - Did the application commit?
  - Is the message non-persistent?
    - Was there Queue manager restart?
    - Did a Channel failure occur?
    - Is Read ahead being used?
  - Did the message have expiry set?
  - Was the queue cleared?
    - Enable event to record a queue was cleared.
  - Does the message appear on the dead letter queue?

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## MQ Commands

- Command interfaces to inquire on MQ object status
  - MQSC – Text format commands
  - PCF – Programmable format, useful for monitoring applications
  - Information also obtainable via tools
    - MQExplorer
    - MQ Operations and Control ISPF panels
- Display object commands show object attributes
  - E.g. `DISPLAY QUEUE(APP1.INPUT) MAXDEPTH`
- Display status commands show current state information
  - E.g. `DISPLAY QSTATUS(APP1.INPUT) CURDEPTH`

## MQ Commands cont'd

- DISPLAY QSTATUS

```
+MQ11 DISPLAY QSTATUS(APP1.INPUT) ALL
CSQM293I +MQ11 CSQMDRTC 1 QSTATUS FOUND MATCHING REQUEST CRITERIA
CSQM201I +MQ11 CSQMDRTC  DISPLAY QSTATUS DETAILS
QSTATUS(APP1.INPUT)

## MQ Log Data Sets

- MQ Log Data Sets record
  - Persistent messages
  - MQ object changes
- MQ Active log placement
- CSQ1LOGP utility to format logs
  - EXTRACT function provides a report record for each event
    - Persistent puts and gets
    - Commit and backout
    - Object changes
  - Extracted messages can be replayed to queues

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## MQ Log Data Sets

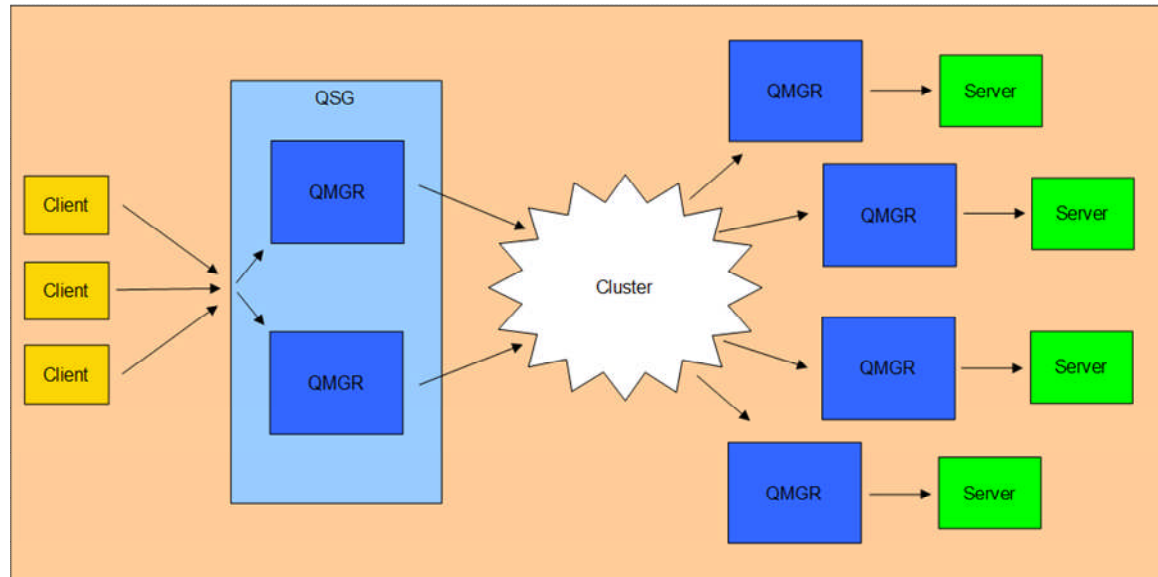

- CSQ1LOGP EXTRACT output

Time and body	UR identifier	Userid	App type	Job	Data length	Queue Name	Message key	Verb	MD
15:08:40.319 D4C44040....	0000B2EEE82	JSMITH	BATCH	APP1	0155	APP.INPUT	00009101	MQPUT

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Variable message routes

## Identifying message routes

- Activity recording (only for distributed MQ)
  - Activity reports generated by applications which perform actions on a message
    - Queue Manager and Chinit
    - User applications
- Can be requested for application messages
- Trace-route messages provide more flexibility
  - dspmqrte tool
    - Generates trace-route requests
    - Collects and displays results

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## dspmqrte tool

- Test application for submitting trace-route requests and processing responses
- Not available on z/OS, but can connect to z/OS queue manager in client mode
- Summary output:

```
C:\>SET MQSERVER=SYSTEM.DEF.SVRCONN/TCP/192.168.1.100(1999)
```

```
C:\>dspmqrte -c -q WINQMGR1.APP1.QUEUE -o
```

```
AMQ8653: DSPMQRTE command started with options '-c -q  
WINQMGR1.APP1.QUEUE -o'.
```

```
AMQ8659: DSPMQRTE command successfully put a message on queue  
'WINQMGR1.APP1.QUEUE', queue manager 'MQ11'.
```

```
AMQ8674: DSPMQRTE command is now waiting for information to display.
```

```
AMQ8666: Queue 'WINQMGR1.APP1.QUEUE' on queue manager 'MQ11'.
```

```
AMQ8666: Queue 'MQ12.TO.WINQMGR1' on queue manager 'MQ12'.
```

```
AMQ8666: Queue 'APP1.QUEUE' on queue manager 'WINQMGR1'.
```

```
AMQ8652: DSPMQRTE command has finished.
```

## dspmqrte tool cont'd

- Detailed output:

```
C:\>dspmqrte -c -q WINQMGR1.APP1.QUEUE -o -v outline
```

```
-----  
Activity:  
App1Name: 'ebSphere MQ\bin\dspmqrte.exe'  
Operation:  
  OperationType: Put  
  QMgrName: 'MQ11'  
  QName: 'WINQMGR1.APP1.QUEUE'  
  RemoteQName: 'WINQMGR1.APP1.QUEUE'  
  RemoteQMGrName: 'MQ12'
```

```
-----  
Activity:  
App1Name: 'MQ11CHINCSQXRCTL1464FA50'  
Operation:  
  OperationType: Get  
  QMgrName: 'MQ11'  
  QName: 'SYSTEM.CLUSTER.TRANSMIT.QUEUE'  
  ResolvedQName: 'SYSTEM.CLUSTER.TRANSMIT.QUEUE'  
Operation:  
  OperationType: Send  
  QMgrName: 'MQ11'  
  RemoteQMGrName: 'MQ12'  
  ChannelName: 'TO.MQ12'  
  ChannelType: clusSdr  
  XmitQName: 'SYSTEM.CLUSTER.TRANSMIT.QUEUE'
```

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Delayed messages

- “Missing” messages may just have been delayed
  - Application sees MQRC\_NO\_MSG\_AVAILABLE
  - Message is found on target queue
  - Perhaps not yet committed
  - Review system log
    - CSQI004I – Non index queue accessed by message or correlation ID (added by APAR PI16027)
- Finding processing delays for problem messages
  - CSQ1LOGP
  - Activity reports
- Identifying queue manager components with backlogs
  - Status commands
  - Statistics and accounting data

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Real-time monitoring

- DISPLAY QSTATUS

```
+MQ11 DISPLAY QSTATUS(APP1.INPUT) ALL

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Statistics and accounting

- MQ can record statistics and accounting data in SMF
- Performance statistics
  - Record type 115
  - Component related
  - Written at statistics interval
- Accounting data
  - Record type 116
  - Task related
  - Written when task disconnects
  - For long running tasks, records are written at the statistics interval as well

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## How to avoid problems

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Detect problems early

- Know what the normal state is for your system
  - MQ joblog messages
  - DISPLAY QSTATUS and CHSTATUS
  - dspmqrte
- Configure instrumentation events
  - Queue manager events
  - Performance events
  - Channel events
  - Configuration events
  - Command events

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

**SHARE**  
in Orlando **2015**

## Know your system

- Queue depths: where are they expected, where are they unusual. Use alerts to get an early warning
- Know commonly issued messages in the joblogs (i.e. certain messages may be issued on a reoccurring basis → know when they may be red herrings)
- Set sensible values on things like max msg size and max queue depth to get an immediate failure rather later performance problems
- Keep reference data
- Trace
- Deal with generated messages (alerts, events, dead letter queue)

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Detect problems early cont'd

- System resource monitoring
  - CPU usage
  - I/O
  - Storage
  - Paging
- External monitoring tools
  - Track MQ supplied data (SMF, RMF, events, messages)
  - Show history of data
  - Configure more sophisticated alerts

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Continue growing your IBM skills

**ibm.com/training** provides a comprehensive portfolio of skills and career accelerators that are designed to meet all your training needs.

- **Training in cities local to you - where and when you need it, and in the format you want**
  - Use [IBM Training Search](#) to locate public training classes near to you with our five Global Training Providers
  - Private training is also available with our Global Training Providers
- **Demanding a high standard of quality – view the paths to success**
  - Browse [Training Paths](#) and [Certifications](#) to find the course that is right for you
- **If you can't find the training that is right for you with our Global Training Providers, we can help.**
  - Contact IBM Training at [dpmc@us.ibm.com](mailto:dpmc@us.ibm.com)

2015

## NEW MQ Labs!

- Wednesday August 12 @ 11:15 in the Dolphin Room Asia 5
  - The Dolphin is not the Hursley pub but the Orlando Hotel
- The MQ project including the developers will be there for Q&A as well
- YOU have the opportunity to be the test subjects for two NEW MQ labs:
  - Developing and Deploying JMS Enabled CICS Applications
    - Explore this brand new feature of MQ and CICS
  - Introduction to Channel Authorization on z/OS
    - You too can keep BOGUS clients off your queue manager
- In addition all the 'regular' MQ V8 and V7.1 labs are available if you want to try things out!

Complete your session evaluations online at [www.SHARE.org/Orlando-Eval](http://www.SHARE.org/Orlando-Eval)

## Shameless Advertising

- In North America the zGrowth Washington Systems Center (aka Advanced Technical Skills) has the following current offerings:
  - Wildfire Workshop IMQ08
    - A two day hands on opportunity to learn about IBM MQ for z/OS V8
